

Tailor made Academic & Career Counselling provided through Diwakar Immigration Services INC, channel partners.

With right guidance students are able to succeed and emerge as productive manpower, says Diwakar Sharma.

Kitchener-Waterloo-Cambridge, Ontario Apr 4, 2022 ([IssueWire.com](https://www.issuewire.com)) - University & College education from Canada, the US, UK, NZ, Australia, and other European countries provides industry-specific skill sets to international students. Diwakar Immigration Services Inc & its partner organization Marvel Educators & Immigration Consultants Private Limited team have geared up to provide case-specific career and academic counselling. Mr. Diwakar Sharma has over 20 years of experience managing and developing international student recruitment channels for schools, colleges, and universities. With his experience and extensive travel overseas, he has developed a system of providing individualized career and academic counselling in both the companies Diwakar Immigration Services Incorporated (Canada) & Marvel Educators and Immigration Consultants Private Limited (India).

Diwakar says, "**Students should *confirm the offer of acceptance after thoroughly aligning self-goals with institutional culture. Students must choose universities/ colleges not because of location or ranking (most rankings are staged), but for programs that ensure career advancement.***"

Our entire team understands the importance of taking the right step forward, and we ensure the proper selection of programs and countries for our clients. Sharma stresses further that most international students are self-funded, and the families of these international students bear the entire expense. We look at every student's unique profile and provide them with viable options that lead them towards a successful journey in the chosen land. Sometimes students and families have no clue about the education level or services provided by universities and colleges. A college education is prevalent in certain parts of the world and certain provinces, whereas some parents seek information about the credentials offered by community colleges. Our team members make sure that our clients receive unbiased and truthful information. We often tell students and families that we cannot provide the services as they don't meet admission requirements or might not be a fit for a particular country.

Diwakar Sharma, a Canada -based Indo-Canadian International Education and Immigration Expert, stresses the importance of providing truthful guidance and keeping information channels open. Our focus is to offer a tailor-made solution to our clients and help them transition from study permit holders to a worker and, if possible secure permanent residency. International recruitment experts often make promises and oversell an institution as higher recruitment is seen as the successful performance of that particular employee. Parents and students must do due diligence in understanding the work culture of the university before accepting the offer and paying the tuition fees; our team at Diwakar Immigration Services and Marvel Educators & Immigration Consultants (MEIC) provide balanced and factual information. Not every student successfully secures a co-op as often promised by institutions; volunteering is a must to enter the job market.

During our pre-departure training, Diwakar provides students with tips for overcoming homesickness; the staff is mandated to maintain regular touch with the students and families all through the academic journey. Sharma says, "it is highly recommended that students volunteer and take any job to develop their skillset before moving overseas." International students have to research the institutions. If they don't see someone like them working for the institution in the positions that matter, it is better to choose

an institution, no matter how small, for self-growth and benefit in both the long and short term.

International students should consider studying overseas for the following reasons:

- First, brush **up on your language skills**-taking; an extra language class when you're out there can be a great way to meet new people.
- **Living in a foreign country is different from a holiday** – Long-term study helps gain local insights.
- **Foreign education will look good on your Resume**: Employers appreciate candidates with higher education and work experience overseas.
- **Meet a diverse range of people** – Your understanding of different cultures will make you more likeable.
- **Make lifelong connections** – Higher chances of making at least one life-long friend.
- Finally, gain **a global mindset**: Whether it's in work or study, you'll be able to use a new global perspective to counter opinions and present arguments.

For career counselling and an unbiased review of your academic profile, reach out to Diwakar Sharma (International Student Recruitment Expert, Former Regional Manager International Recruitment & Partnerships at Wilfrid Laurier University, ON, Canada) & a Regulated Canadian Immigration Consultant). Author of seven books and various papers, currently working on a new script. Diwakar Sharma is the Founder, Director of Diwakar Immigration Services Inc, and CEO of Marvel Educators & Immigration Consultants Private Limited: Email: diwakar@meic.io or dsharma@rushtocanada.ca.
