

Time to upgrade: The latest N95 Medical Mask cleared and registered with the FDA is announcing Patent Pending 4 Ply ASTM

Wearing masks in a professional environment has never been more critical. Already an FDA registered face mask were announcing that Liz'N Health Surgical Mask 3D is now Patent Pending. ASTM F2100 for high breathability and 4 layer filtration is here.

Boston, Massachusetts Apr 7, 2022 (Issuewire.com) - If you are a healthcare professional, you know the importance of wearing a **medical mask** cannot be overstated. Wearing a mask helps protect oneself and others from the spread of potentially harmful airborne particles.

While there are many different types of masks available on the market, the N95 medical mask is considered to be the ultimate solution for healthcare professionals. The **N95 medical mask** is a type of personal protective equipment designed to filter out small particles from the air. These masks are typically worn by healthcare workers who are in close contact with patients. The N95 designation means that the mask can filter out at least 95% of all airborne particles, making it an extremely effective tool in the fight against the spread of illness.

There are many advantages to wearing an N95 medical mask. Here are some of them:

- **Protection from Airborne Particles**

One of the most important benefits of wearing an N95 mask is providing protection from airborne particles. By filtering out these tiny particles, the mask helps to keep you from inhaling them into your lungs.

This ASTM Level 3 Mask is tested & approved. See the results of the **Nelson Laboratories, LLC: Liz'N Health [Latex Particle Challenge Final Report](#)** highlighting an **Average Filtration Efficiency of 99.53%**.

"All test method acceptance criteria were met. Testing was performed in compliance with US FDA good manufacturing practice (GMP) regulations 21 CFR Parts 210, 211, and 820."

- **Effective**

Perhaps the most crucial benefit of the Liz'N Health N95 medical mask is that it is highly effective at filtering out small particles from the air.

It means that you can feel confident that you are doing everything possible to protect yourself and others from the spread of illness.

- **Comfortable to Wear**

Another great benefit of the N95 medical mask is that it is very comfortable. The mask is designed to fit snugly over your nose and mouth, and it includes a built-in exhalation valve that makes it easy to breathe.

- **How to Wear**

Unlike some other masks, wearing the N95 medical mask is straightforward. To mask up, put it on and secure it over your nose and mouth before looping it on the ears. There is no need to constantly adjust or readjust the mask, which can be a nuisance.

- **Affordable**

Compared to other personal protective equipment types, a black medical N95 medical mask is cost-efficient. That makes it an excellent option for healthcare professionals who need to use them regularly.

- **Disposable**

If you are looking for a [disposable medical mask](#), N95 masks are the way! It means that you can discard them after each use.

It helps to ensure that you do not have to constantly clean and disinfect your mask, which can be a time-consuming process.

- **Custom-made**

The Liz'N Health N95 is a **custom medical mask**. It means that it is designed specifically for healthcare professionals.

The mask is made to fit snugly over your nose and mouth, and it includes a built-in exhalation valve that makes it easy to breathe.

- **Conclusion**

It is clear that medical masks are essential. With the SARS pandemic, including Covid-19, Omicron, and now BA2, it has become even more important now to mask up than ever before. These medical masks are a hot commodity, flying off the shelves. Hospitals, clinics, and other health care providers are stocking up on these masks because of their potential to protect against the spread of coronavirus.

[Liz'N Health Surgical Mask 3D](#) is an excellent option if you are in the market for personal use mask. This mask is made with high-quality materials, and it fits comfortably over your face.

About Liz'N Health

Liz'N Health LLC is headquartered out of Boston, MA with offices in NJ and CA with an eye on improving health and wellness products. The genesis of Dr. Sinh's earlier days included being mentored by C. Everett Koop with whom he published several medical papers. At the outset of Covid, Dr. Sinh identified a fractured supply chain in the USA. Healthcare workers, state & federal agencies, and the public would not have access to enough face masks. His initial objective was to ensure everyone has access to FDA-registered PPE, not counterfeit or unregistered products that subsequently engulfed the medical supply market. Second, he always believed that wearing the "right" mask would be the most important defense against infection. He lives most of his life in operating rooms on the east coast alongside top surgeons. Dr. Sinh witnessed Doctors and Nurses struggling to find comfort and breathability forced to wear N95's or double masking. He analyzed the science and aesthetics, which led to developing a proprietary 4ply mask with carbon activation filtration. The next step was to have these cleared and registered with the FDA. The FDA granted Dr. Sinh Level 3 certification as a Surgical mask for the operating room and listed Liz'N Health Surgical Mask 3D as a medical device under the designation FXX. The mask has recently received the status of Patent Pending.
