

Tragofone Announces its Softphone's Free Trial for Enterprises to Leverage Unified Communications

Tragofone has announced a free trial of its WebRTC-based VoIP softphone app, for businesses to experience first-hand how it brings ease, speed, security, and scalability to communication between teams of all sizes.

Announcing TRAGOFONE FREE TRIAL

White Label Softphone
With WebRTC And Zero Touch Provisioning

Ahmedabad, Gujarat Apr 13, 2022 ([Issuewire.com](https://www.issuewire.com)) - If an enterprise wants to experience how a WebRTC-based VoIP softphone app can transform their business communication, this is just the right opportunity. Tragofone has announced a free trial of its WebRTC-based VoIP softphone, for businesses

to experience first-hand how it brings ease, speed, security, and scalability to communication between teams of all sizes.

Accessing [Tragofone's free trial](#) is a smooth and quick process. All that you need to do is fill in a form on the Tragofone website, share basic details like name, contact details, and company name, and your free trial gets activated. Once the request formalities are completed, users will instantly receive credentials for using the Tragofone VoIP app either on iOS or Android.

While the trial cost nothing, it offers all the rich communication and collaboration features that Tragofone offers. Business teams can experience HD voice and video calls, reach their colleagues and customers in quick time using messaging and chat rooms, and use the web portal to enable seamless auto-provisioning.

While announcing the Tragofone free trial, Mr. Maulik Shah, Co-Founder & Director, Ecosmob Technologies, said, "Softphones have taken the business world by storm. They have transformed the way employees can communicate and collaborate with each other and with customers. As the global workforce moved to a remote work environment during the pandemic, the use of softphones became more entrenched in the corporate world."

Built by Ecosmob Technologies, Tragofone is a fully-loaded softphone that is available to enterprises wanting to experience WebRTC-powered mobile dialers.

Tragofone offers many communication benefits to businesses. The softphone comes with varied communication features, including audio calls, video calls, conferences, and chat. Users can also share files and images, transforming regular interactions into advanced business meetings. Powered by WebRTC and SIP, the softphones are secure, quick, and easy to install, provide seamless audio and video quality, and encrypted communication.

Tragofone white label VoIP app has been engineered keeping the requirements of enterprises and end-users at the center. They're easy to use and provide a seamless calling experience. The tragofone softphone app comes packed with comprehensive features ranging from auto pop-ups on incoming calls, a customized 'Get Started' screen, and a comprehensive home screen that displays the call history, contacts, and settings.

Given its diverse and unique features, Tragofone is clocking a fast-growing enterprise user base. If your company is interested in incorporating this telephony solution into its communication portfolio, you can reach out to Tragofone on phone at +1(540) 346-3663 or [request a demo](#) on the company website.

About Ecosmob Technologies: Ecosmob Technologies is an end-to-end software services and solutions provider that delivers customized IT solutions with a client-centric approach. It offers high-quality, enterprise-grade IT solutions and services to clients across the world.
