

V3cube Technolab's Uber Clone Hits The Nigerian Market With New Fervour

Lagos, Nigeria Apr 5, 2022 ([Issuewire.com](https://www.issuewire.com)) - V3Cube Technolabs LLP announces the launch of the brand new and loaded Uber Clone app in Nigeria. While they have been the pioneers in this industry, the company claims to continuously listen to the feedback from the clients to add features that can be regionally helpful to entrepreneurs.

Their latest Uber Clone for the year 2022 makes the app completely suitable for Nigeria with features like never before. "We have always kept our doors and ears open for our clients. We keep listening to the things that people need on the actual ground. This is why; our research team believes in working closely with the development team in order to add new features to our apps", says the chief app development crew at V3Cube.

The Uber Clone app is one of their best-selling apps around the world owing to the seamless flow it has to offer and the ease with which people can utilize the app not just to hire a cab but also to rent a car or even carpool.

The new additions to the Uber Clone app developed by V3Cube include features like a local currency converter inbuilt into the app, other payment gateways specific to Nigeria, integration of multiple local languages as well as currency, and much more.

DRIVER FRAUD SAFETY

Since every entrepreneur wants to make sure that they don't get hoodwinked out of their money, the app offers an additional safety feature so that any kind of driver fraud can be prevented.

This feature makes sure that drivers cannot mark themselves as 'Arrived' on a location unless they are within a specified radius within the region where the request is generated. This ensures that drivers cannot simply accept rides without being responsible for them. The radius of operation can be set from the admin panel.

GREAT GOODIES FOR ALL ENTREPRENEURS!

It is no secret that the transportation business has grown significantly within Nigeria over the last few years. Finding the right kind of [Uber clone Nigeria](#) can prove to be critical to the success of this business. With the Uber Clone app built by V3Cube Technolabs LLP, you can grow your business multifold quickly and easily.

They not only empower you to test the app thoroughly before you actually launch it on the app stores, but also ensure that you get great post-sale service. They offer annual upgrades, bug fixing, and much more.

"For us, it's all about the joy of watching our products bring success to different corners of the world. Nigeria has a special place in our hearts because one of our first clients almost a decade ago was from there. Today, we are proud to say that we have clients all over the world. Our apps are created with the sole purpose of bringing in profitability", says the V3Cube Technolabs LLP spokesperson.

While the Uber Clone taxi booking and ride-sharing app remain one of their best-selling apps, their other successful applications in the on-demand sector include the Gojek clone app, Food Delivery app, Grocery Delivery apps, Handyman Clone apps, and more. Check out their website for more details.
