

Ventriks Achieves ISO 27001 Certification

Compliance with the International Standard for Information Security Management Expands Ventriks Commitment to Data Privacy and Security

London, United Kingdom Apr 8, 2022 ([IssueWire.com](https://www.issuewire.com)) - LONDON, BANGALORE 8th APRIL 2022 - Ventriks, a cloud data technology company, has achieved ISO 27001:2013 certification for information security management systems (ISMS), demonstrating the company's commitment to the highest level of internal compliance and security.

ISO 27001 is recognized as a stringent and international standard for information security management. To achieve the ISO 27001 certification, organizations must demonstrate a systematic and documented approach to protecting and managing sensitive company and customer information including intellectual property, employee and customer data, financial information and information entrusted to it by third parties.

Attaining ISO 27001 certification for both its U.K. and India office, Ventriks engaged in a rigorous third-party audit of its internal ISMS processes in information security, cybersecurity and privacy protection, subject to ongoing evaluations to maintain this status.

"Leveraging the ISO framework for our security implementation has provided Ventriks with a common language as we continue to deploy controls and procedures throughout our organization," added Quigley, CEO Ventriks. "With our ISO 27001 certification, we're demonstrating to our customers that we have applied appropriate controls throughout both our corporate and production environments for continuity, integrity and availability."

About Ventriks

Ventriks help customers accelerate and enable actionable information with the cloud-native Ventriks Data Platform. Unbounded by scale, flexibility and data type, organisations can extend and mature their data management and analytical workloads using data-application ready connectors, automated workflows and an advanced business rules management system, supported by a Digital Data Marketplace. Ventriks powers the complete data journey across all industries and geographies.
