

World's Biggest App KingX 2022

The Gojek Clone app's latest version of 2022, the King Version becomes the biggest app in the multi service world. Take a look at the details of this multi service app right here.

Acton, California Apr 8, 2022 ([Issuewire.com](https://www.issuewire.com)) - The Gojek Clone app by the App development company has already claimed its throne as one of the best on demand multi service apps in the world.

However, they have just upped the ante by launching the brand new and latest King version of the Gojek Clone app for the year 2022.

Loaded with some of the most surprising and useful features, the King Version of the Gojek clone app has made waves within a few months of its launch. “We have worked for many international clients over the past decade but the kind of response that we got for the Gojek Clone King Version was overwhelming. Just in a matter of a few days of the launch we had to work overtime to meet the demand of the app. We are very proud of our team for having added these new features and making it so successful”, says the management of the Mobile app development Company.

The new features of the Gojek clone app King Version include:

- Service Provider Bidding:

Using this feature, the service provider can make bids for job request. This means that when a user posts a requirement for a task, multiple service providers in and around the region can go ahead and place their bids on the task. The user can then choose the service provider that provides the lowest quotation.

- Instant online consultation:

This is a feature that allows users to book online slots for video consultation with experts. For example, a user can consult a doctor or a lawyer online. They will be able to share their problems and get solutions without having to worry about physically visiting the doctor or lawyer.

There are of course other features that make this app special, but for the most part, Company enjoys a great reputation amongst its clients owing to the fact that it offers a very good after sale service to its clients. Whether it is giving bug support or support for app rejection on the app stores, this company has always been there as a stalwart for its clients.

“As we have always maintained gold standards in the industry, we enjoy the support and appreciation of our clients. Our work is dedicated towards ensuring continued profitability for our clients. We aim to make absolutely certain that your hopes and aspirations with your idea can materialize by way of our app”, says the project manager and development head at App development company.

Apart from the [Gojek Clone App](#) King version, the company also specializes in building and launching other on demand mobile apps such as On demand food delivery, on demand grocery delivery, on demand service provider for hire, on demand taxi booking solutions,s and much more.

Clone App development company has been building and launching on demand apps for almost a decade. It has launched over 2000 apps on the Google Play store and the iOS app store. Their top selling product is the Uber clone app. Their Gojek clone app has also garnered tremendous response from clients all over the world.
