

2nd Edition of European Lasers, Photonics and Optics Technologies Summit

Elos2022

2ND EDITION OF EUROPEAN LASERS, PHOTONICS AND OPTICS TECHNOLOGIES SUMMIT

SEPTEMBER 05-06, 2022 | PARIS, FRANCE

HYBRID EVENT: YOU CAN PARTICIPATE IN PERSON AT
PARIS, FRANCE OR VIRTUALLY FROM YOUR HOME OR WORK.

REGISTER

Paris, France May 16, 2022 ([IssueWire.com](https://www.issuewire.com)) - **Magnus Group** cordially invites and welcomes you all to the “**2nd Edition European Lasers, Photonics and Optics Technologies Summit (ELOS 2022)**” during **September 05-06, 2022 Paris, France** in Hybrid Format which runs with the theme “**Multifaceted aspects of Lasers, Photonics and Optics technologies**”

ELOS 2022 will offer you an impressive roster of speakers, and attendees and it is an excellent opportunity for leading academicians and scholars from universities and institutes to interact with world-class scientists.

This conference is initiated to meet and discuss the collective goals of the scientific community specifically focusing on the field of **Sciences** and exchanging ideas & knowledge which facilitate the collaboration between the scientists, experts, academicians, and researchers of the same field or interdisciplinary research.

Upcoming Optics Conferences: [Optics Conferences 2022](#) | [Lasers Conferences 2022](#) | [Photonics Conferences 2022](#) | [Optics 2022](#) | [Optics Events](#) | Lasers Meetings | Photonics Congress | Optics Meetings | Lasers Meetings | Photonics Meetings | International Optics Conferences | International Lasers Conferences | International Photonics Conferences | Fiber Optics Conferences | Quantum Optics conferences | Lasers congress 2022 | Photonics congress 2022 | Optics congress 2022 | Lasers conference in Paris France | Photonics Conference in Paris France | Optics conference in Paris France | Lasers congress | Photonics congress | Optics congress | Laser meetings 2022 | Photonics meetings 2022 |

Scientific Sessions:

Quantised Light-Matter Interaction

Lasers

Biophotonics and Medical Engineering

Nano-optics and Metasurfaces

Biophotonics

Novel Laser Technologies and their Applications
