

A Giant That Never Sleeps and Keeps Moving

Omaha, Nebraska May 19, 2022 ([Issuewire.com](https://www.issuewire.com)) - AWL India is one of the best logistics companies in India that works on a cost-effective movement of goods on a massive level with the help of automation and AI. The company has served over seventy-five thousand clients, manages 10 million sq. ft of warehouses across India, and delivers to thousands of cities across India. Now, AWL India is setting footprints in the US market as well. The organization today understands that to remain effective in the world market, they must solidify the customer-centred supply chain or outside-in supply chain model. AWL India is a focused supply chain enterprise that switches into customized service platforms where

data from other client companies can be sensed through the platform and bulldozed back into the system to enhance delivery speed and overall delivery experience.

As the Indian government is inviting companies to India and aspiring to become the biggest exporter in the world, the company's vision is to focus more on helping giants from around the world in various sectors and provide them with a great logistics infrastructure. Companies eager to set up in India are seeking the help of AWL India to leave a mark here. Modern logistics practices and innovations have transformed the flow of goods from manufacturers, retailers, or wholesalers to end-users. AWL India has partnered with numerous programs across the globe like [US Aid](#), [African Health Bureau](#) (AFB), and Samriddhi Yojana in India to offer great support in logistics in India. According to the chairman and Founder Rahul Mehra, "AWL India has a wide range of solutions that can be tailored to every business's particular needs. We aim to optimise and improve the supply chain, helping foreign companies gain a competitive advantage." AWL India is also continuously working on the model where AI is taking control of the processes to make them faster and more efficient keeping the customers' interests in mind. From inventory processes to delivery, AWL India has incorporated a high-tech way of performing logistics that very few logistics companies have adopted in the world.

AWL India has larger operations and presence across PAN India. Smart equipment, autonomous vehicles, and other advancements drive exponential growth in the company in the coming years. Complete operations at AWL India will be highly automated with the help of AI and robotics, with each consignment leaving a digital data point behind, and the company is a mine of structured data. AWL India can transform its operations by leveraging automation, artificial intelligence, and advanced analytics to increase reliability, efficiency, and cost-effectiveness. In the coming times, Rahul Mehra has decided to bring the company to an elite league of fully automated [logistics corporations](#) with continuous growth and innovation in technology. AWL India has always been the fastest growing [technology-oriented logistics company](#), specialising in national and international distribution and warehousing for a long list of industries to serve worldwide. And with constant efforts to serve the biggest companies in the world to set up in India, AWL India is all set to bring the world to the Indian stage.
