

Blue Frequency feat. Sorn - Changes

FULL RELEASE: 10th JUN 2022

London, United Kingdom May 8, 2022 ([Issuewire.com](https://www.issuewire.com)) - Blue Frequency returns to Ruff DnB with 'Changes'. Featuring fellow producer Sorn, the track picks up where the previous EP, In This Moment, left off. With a star-gazing approach to drum & bass, the melodies laid down here recall warm, euphoric moments with friends. It's a perfect soundtrack to the small hours when the night is winding down, and the day's activities become memories stored in the brain.

'Changes' is a euphoric take on drum & bass. Delicate piano notes and soaring vocals kick off the track; while a driving percussion pattern quickly joins the mix. The two bring the senses into focus like the cold wind to the face.

The tide rises, guided by flashes of FX and the growing intensity of the drum lines. In an instant, we're into the verse 'Changes'. Here, mountainous synth lines that are smooth in texture populate the mix, a hyper colour blend of sound rushing through the speaker.

'Changes' will land on all digital platforms on 10th June.
