

## BUKA Telecommunication Launches SMS service for Business Owners to Engage More Customers

China Skyline Telecom Co., Ltd. also known as BUKA company is a leading SMS service provider with thousands of worldwide clients. The company offers a wide variety of SMS services, including Verification SMS, Notification SMS.

**Guangzhou, Guangdong Sheng May 24, 2022 ([IssueWire.com](https://www.issuewire.com))** - BUKA company/China Skyline Telecom Co., Ltd. introduces a comprehensive [SMS service](#) for global customers. The company service is available for developers and business owners around the world. BUKA is a leading SMS service provider from China with services ranging from Verification SMS, Voice Call, Voice SMS, Notification SMS, Marketing SMS, Group Calls, etc. A representative of BUKA said, "SMS was a popular messaging service for smartphone users in the 2000s, but Short Message Service is also a powerful marketing tool for business owners and developers nowadays. If you have a business, you can engage more customers and send tailored messages to your customer lists if you have a new offer from your business. With BUKA services, sending bulk SMS is no longer a hassle and more convenient to grow your business."

BUKA has helped its customers grow their business with [SMS notifications](#) service. BUKA SMS notifications service is suitable for various industries such as social apps/Websites, Cross-border E-commerce, Financial Sector, Game Industry, Logistic Industry, and more. This service is able to send personalized messages and increase customers' engagement. Business owners can send personal birthday messages or send special offers to customers. In the financial industry, customers can get notifications of account balance, suspicious transactions, repayment reminders, etc. For e-commerce, the SMS notifications service can reach customers about the latest offers and activities as well as payment care, delivery care, and refund care, which enhance the shopping experience and improve the order conversion rate.

Besides SMS notification, other services like [SMS OTP](#) increase registration conversion rate and accelerate the business process. SMS OTP (One-time password) supports various languages and helps customers to carry out security verification in under 5 seconds. "Create more value to your business against competitors with BUKA SMS services. Our company is ready to help customers with 7x24 online support," said a BUKA representative.

BUKA SMS service cooperates with hundreds of global operators in 190+ countries and helps clients to reach their goals. The company has more than 15 years of experience in the global telecommunication industry. As a global telecommunication company, BUKA strives to provide fast and safe personalized SMS service, increasing customer engagement and extending customers' life cycle.
