

Dr. Kannan Vishwanath invited to address on the new challenges of global pharma industry in London

Global Pharma in paradigm shift.R&D Spending & New Drug Development will be key drivers for Pharma Innovations says (Prof) Dr. Kannan Vishwanath, Rupus Global Limited.

California City, California May 23, 2022 (Issuewire.com) - California, United States. (Prof) Dr. Kannan Vishwanath, Managing Director of Rupus Global Limited (www.rupusglobal.com) asserted that going forward, Partnerships & Collaborations will drive the global pharmaceutical industry. Dr. Kannan Vishwanath will be sharing his thoughts at the 3rd International Pharmaceutical Conference in London, the UK on July 14-15, 2022. Innovations, Inventions & Initiatives to explore both Covid & Non-Covid Portfolios. The global pharmaceuticals market size was USD 1,230.2 billion in 2019 and is projected to reach USD 2,151.1 billion by 2027./ In comparison to other industries, pharmaceutical companies are more driven by the imperative to manufacture innovative products, and thus to spend significant amounts on research and development. This is largely due to the time-limited patent protection of drugs and the following threat of sales erosion through generic and biosimilar competition. Two major effects of patent expirations for the pharma industry are a specific high R&D intensity and a growing focus on specialty drugs to diversify their product portfolio. For the last several years, major developments in pharmaceutical research and development have begun to change the R&D landscape. A growing number of drug manufacturers are outsourcing large parts of R&D, mostly to clinical research organizations (also contract research organizations), with the main aim to reduce costs

Rupus Global Limited has an extensive research portfolio of Pharmaceutical API's in key segments such as Anti-Inflammatory, Analgesic, Anti-Pyretic, Anti-Protozoal Agent, Anti-Diabetic, AntiDiarrheal, Anti-Protozoal, Anti-Parasitic, Vitamins, Inflammatory Pain Excipients, Sterile Penicillin, Anti Cancer
