

Get a Fax Number from Segway Communications and Send your Documents Securely

Los Angeles, California May 17, 2022 (Issuewire.com) - In the past years, traditional fax transmissions were the only way to send and receive written communication. For this, fax machines were required to print a document received from thousands of miles away. But today's digital faxing options are much more convenient and no longer require large, expensive, and noisy equipment, paper, or ink. You can access the power of fax from your smartphone, tablet, or desktop to send a document. It allows you to send information quickly and securely to your boss, client, customer, colleague, or vendor.

There are different ways to send electronic fax, however, email is the most popular option. This e-fax service is easy to use as you can choose any email service provider and include any document. If you are searching for a provider to [Get a Fax Number](#), look no further than **Segway Communications**. It is one of the largest privately held hosted messaging service provider companies in the US. No matter which type of fax number you select, you will be able to use it to send and receive faxes wherever you are.

Since 1977, Segway Communications has met the telecom needs of more than one million clients in the

US and Canada. The reputed firm offers free local fax numbers in the area codes across the country. As a result, you can create a local business presence in your hometown and additional specific markets you want. In addition, the number will keep your documents safe while ensuring they get to the proper destination on time. Also, there is no requirement for a fax machine, app, or software to send faxes.

Besides this, you can avail of their package for only \$7.95 which includes 300 faxes per month. Another plus point is that you can send faxes to more than one email address. Whether you already do business internationally or hoping to start, **Segway Communications** can help you create a local presence in 131 countries with local, national, and toll-free numbers that ring directly to you, take voicemails, and receive faxes.
