

Gigablock Announces to Launch World's First Decentralized Commerce Ecosystem For expanding the future

Giga Block - GIGA Is BEP-20 LP Acquisition smart token-based ecosystem. Gigablock ecosystem team is developing different smart protocols to change the shape of a decentralized world and it will open new horizons for Fiat Currency.

Fowey, Cornwall May 27, 2022 ([Issuewire.com](https://www.issuewire.com)) - So finally, the [Gigablock](#) founder & development team announced in a recent live meeting that the gigablock team is going to launch the ICO campaign of a global decentralized gaming ecosystem based on blockchain technology. This is the first solution in the e-sports market that provides a decentralized interaction of gamers, viewers, and the platform itself. Gigablock is an ecosystem that provides multi-level interactivity of the gaming process, decentralized world, and forex industry as well as gives worldwide crypto users the to monetize their earnings

Gigablock is also developing the ecosystem for a competitive decentralized market where Decentralized Exchange, Aggregated Decentralized Multi-coin Wallet, Gigablock NFT Market place and, Gigablock HUB for advance content contributors/creators & a Biggest Global Utility Platform in Forex Market. Also, the Gigablock gaming platform creates a different tournament. Gigablock protocol helps for online broadcasting of multi-chain wallet transactions & another utility platform that can help to grow the forex

community.

The team of Gigablock creators includes professionals with deep practical experience in blockchain, the gaming industry too, digital television, media, and blockchain technologies, and have an excellent practical understanding of the market structure, consumer behavior, and conversion attraction models.

“Gigablock team created a two different unites for its larger army with (crypto and gaming) and it will generate more benefits for both. The gaming industry is one of the fastest developing industries in the world, but nevertheless, its potential is much larger than it seems.” says Gigablock CEO, “We see blockchain and cryptocurrency in conjunction with a competently built ecosystem for gamers as an excellent solution for the industry.”

The Gigablock economy assumes absolute transparency, the absence of boundaries, and its own token ([GIGA](#)) will be the main means of payment within the Gigablock ecosystem. We are also pleased to note the willingness of leading professionals in blockchain commerce platforms and another decentralized platform for the crypto finance world. To be among the partners of the next generation. As per the CEO of Gigablock “together with the project team – this is a highly reliable ecosystem & protocol in the world.

Gigablock Business Opportunities and Interaction

In terms of business, Gigablock is creating a multipurpose decentralized finance protocol and not a service for solving one or more specific terms. Gigablock is an independent decentralized finance platform that is also creating a new age of crypto game content generator and a potential partner for other e-sports platforms. With its help, it is possible to constantly integrate new products and attract as many partners as possible who will interact with the audience with the help of blockchain technology.

Gigablock will open up new possibilities for beginners and for well-known developers, streamers, and non-professional players, as well as pave the way to the “big league” for a huge number of little-known and medium-sized gaming disciplines.

Our main goal is to give the industry a versatile ecosystem, in which users can satisfy all their interests and requests and earn from them.

We offer a versatile apparatus that will enable players to earn victories in competitive matches and tournaments, trade in-game objects, conduct game broadcasts, or raise funds for developing their own game within the framework of the platform. Investors (who have invested in internal games) and developers will receive a certain commission for each gaming transaction.

The Gigablock ecosystem is built around the decentralized finance process. While the worldwide business users compete among themselves and generate profit with Gigablock protocol and buy/sell GIGA tokens using the Gigablock decentralized exchange platform. Gigablock also receives a portion of the commission taken by the platform from transactions and decentralized pools.

In addition, the Gigablock can be broadcast using the GIGA next-generation ecosystem and integration with Binance smart chain, so the platform receives new audiences, and the Gigablock automatically grows worldwide.

The whole Gigablock ecosystem is built using a system of multiple smart contracts, so all the described actions are handled automatically.

With the help of blockchain technology and smart contracts, the whole process becomes as transparent and automated as possible, which makes the platform a strong extension of the existing industry and enables the use of cryptocurrency in real business.
