Northridge, California May 11, 2022 (Issuewire.com) - Our [personal injury law firm](#) expands its services to the **Northridge** area in response to the community necessities.

Car accidents continue increasing in the San Fernando Valley due to numerous factors such as drivers under the influence of drugs and alcohol, drivers without a valid license, and inexperienced young drivers, to name a few of the **more frequent causes** of car accident deaths.

Recently, the Street Racing Task Force which is part of the Los Angeles Police Department Valley Traffic Division issued 55 citations for speeding, 64 for not stopping at stop signs, 10 for running red lights, and more than 60 for modified exhausts that can be nuisances for residents.

This is a simple example of the lack of culture that leads to car accidents in our neighborhood.

Not to mention, in 2021, 294 people were killed in traffic accidents; 1.465 were seriously injured from the same cause. Many of these accidents happened in the **San Fernando Valley**, specifically in the Northridge community.

Drivers who are afraid to face the consequences of their mistakes will often flee the scene, leaving their victims with limited options for covering their medical bills and other losses.

For this and many other reasons, Goldberg Injury Lawyers is proud to announce the expansion of its law firm with a new office in Northridge, providing its clients with better access for their auto accidents, motorcycle accidents, and pedestrian accident cases.

Our highly qualified law firm with over 35 years of experience will remain committed to providing quality service, personalized attention, and keeping the best interest of our clients in mind. Helping them obtain medical care as well as maximize compensation for injury recovery.

Being involved in an auto accident is a situation that, in addition to the physical and emotional injuries, demands time and expertise to resolve in a professional manner.

Goldberg Injury Lawyers will always look for ways to make our community and neighborhoods safer and more desirable.
