Inbound Connections Announces Exciting Launch of Virtual Contact Center

An amazing new work-from-home opportunity is now available with Inbound Connections for call center agents.

Dallas, Texas May 9, 2022 (Issuewire.com) - There is no shortage of people looking for reliable, ethically run work at home opportunities. Eye-opening news, a new company is answering the call, Inbound Connections. Inbound Connections is now hiring a large amount of work from home agents, looking to fill positions like customer service, technical support, and sales. All jobs have flexible schedules (but at least a 15-hour-a-week commitment), are independent contractor positions, and agents have the opportunity to work for multiple clients nationwide. The early enthusiasm surrounding the new employer is high and rising.

“We do our best to source the perfect agent for our clients,” commented a spokesperson from Inbound Connections. “And we also do our best to treat our agents as well as possible. This combines for a real win for all involved.”

According to the company, no experience is required, and all hires are put through a thorough training process to certify them for their position and ensure that quality service is delivered. Pay ranges from

$10 to $17 an hour, and many perks, as well as a bonus for completing certification, are offered. This combination of training and good pay can be quite rare, with many work-at-home entry positions on the job market today. Inbound Connections is making every effort to deliver an exceptional experience that leaves workers motivated and happy to perform.

Unfortunately, agents are currently not accepted from California, Connecticut, Maryland, Massachusetts, New York, Oregon, Washington D.C., or Wisconsin.

Requirements include a quiet place to work from home, high speed, reliable internet, and a desk or laptop computer with Windows 7, 8, or 10.

Complete details can be found on the official company website.
