Pharmacy is the health science that links medical science with chemistry and it is charged with the discovery, production, control, disposal, and safe and effective use of drugs. The practice of pharmacy requires excellent knowledge of drugs, their mechanism of action, side effects, interactions, mobility, and toxicity. Pharmacists, also known as chemists or druggists, are health professionals who specialize in the use of medicines, as they deal with the composition, effects, mechanism of action, and proper and effective use of drugs.
