LBank Exchange

Lbank exchange is considered to be one of the top crypto assets exchange platforms, where you can trade various cryptocurrencies worldwide. It has more than \$1 billion daily trading volume with 6.4 million registered users all over the world.

It has been there since 2015, and throughout the journey, it has proved itself as one of the safest crypto trading platforms. It also provides its users esoteric financial derivatives, and professional services to manage their crypto assets.

Introducing (Nesten)

[Nesten](#) was created in 2018 in Tustin, California. Nesten has listed its name as a pioneer in blockchain and edge computing technology. It has provided people with a trusted communication platform and specified tools to make it convenient for the multitude.

One of the most crucial technologies of the 21st century is the Internet of Things (IoT). It forms a network over all the devices and systems and makes the exchange of data possible and more convenient. More than 10 billion devices rely on the Internet of Things (IoT). When the Internet of Things (IoT) is evolving to its full potential but in the meantime, the centralized telecom networks that manage both distributed control and data planes are failing to provide the required circumstances the Internet of Things (IoT) needs.

This is where the [Nesten\(NIT\)](#) comes to the rescue. For a decade or more, Nesten utilizes blockchain technology to create a secure and transparent network in order to optimize the Internet of Things (IoT) by which it entrusts the people that the data and any profit rising from it stays with them. It has also launched the WiMAX network that helped the modern-day 4G and 5G technology to establish.

[Nesten](#) has worked in the field of communication to an incredible extent. It has deployed its flagship communications and computing platforms—the G1 wireless nodes, in various developing cities in the world in 2019. Since then, Nesten frequently expanded its presence in the Internet of Things (IoT) and a lot more visionary projects.

Nesten has also created its very own cryptocurrency with the same name Nesten(NIT) which got listed on LBank Exchange at 18:00 (UTC+8) on May 11, 2022, to secure a place on one of the biggest crypto exchange platforms. It has made a convenient way for data transactions through tokens generated within the ecosystem, and as a way to provide meaningful financial incentives for maintaining network performance.

The extensibility and reliability of [Nesten's](#) network add itself to other companies interlinked around a similar niche. It has solved its patent-pending, shared parking, and advertising solutions by implementing the network's own crypto wallet and modular payment system to easily integrate NIT payments with application software. Nesten also brought various leading companies together for the development of wireless communication and cryptocurrency. It has also a major contribution toward the expansion of 5G.

About NIT Token

[Nesten](#) has created its own crypto wallet and its own cryptocurrency token as NIT. Which has provided stability to its own financial architecture. NIT is built on the Ethereum blockchain. NIT is the essential contribution of Nesten to the world of crypto. It has been a preferred mode for data transactions.

A total of one billion (1,000,000,000) NIT was created initially. Of which 65% were reserved for ecosystem functions which include network buildout, coverage verification, and proof reward allocation, and 35% were reserved for conducting the company's other operations.
