

New Office 365 Single Sign-On Integration Makes Inventory and Asset Tracking Software More Accessible

How Using Office 365 Integrations for Inventory System and Asset Management Will Improve Efficiency.

San Jose, California Jun 7, 2022 ([Issuewire.com](https://www.issuewire.com)) - On May 26th, 2022, ASAP Systems of San Jose, Calif. announced that their software will now be able to be integrated into Office 365 through Single Sign-On (SSO). This is the newest feature that has been added to their [inventory management](#) and [asset tracking software](#). With this feature, users will be able to access their [inventory system](#) from a single platform just as they can access Microsoft Word, Excel, and other essential tools. This will allow users to move seamlessly between the software and other programs they might need throughout the day.

In a new tutorial to support the release of the SSO feature, the CEO of the company provides more insight into the benefits the new feature will bring. "Users will have a more straightforward experience when logging into BarCloud," said the CEO. "It provides a more secure and convenient platform, and forces better password policies while eliminating password fatigue while simplifying access management to your organization."

The new tutorial walks users through the integration process from start to finish so that their Inventory System and Asset Tracking Solution can be accessed through a single platform in a matter of minutes. The tutorial will be available on the organization's YouTube channel and is displayed for you below.

[ASAP Systems](#) is a market leader in Inventory System and Asset Tracking Solutions that use [Barcode technology](#) with mobile Barcode, smartphones, and tablets. They help improve profitability by eliminating manual data entry, paper files, and forms and by automating record keeping. With their powerful system, businesses know 24/7 how and where Assets and Inventory are received, stored, used, and disposed of in the warehouse, field, and/or in the office. They have offices in California (headquarters), and Chicago.
