

Regaia Energy Accepts \$FIX Crypto for the Trillion-Dollar Algae Biofuel Industry

#1 Crude Algae Oil Producer: Algae-Modular Automated Plantation (A-MAP) Patented Tech System

Singapore, Singapore May 9, 2022 ([Issuewire.com](https://www.issuewire.com)) - #1 CRUDE ALGAE OIL PRODUCER: ALGAE-MODULAR AUTOMATED PLANTATION (A-MAP) PATENTED TECH SYSTEM

- Regaia Energy Pte Ltd, representing Next Generation Oil Group (<https://myoil.com>) in Malaysia and Singapore, with Boustead Holdings (MYX: 2771) as the key institutional shareholder, has perfected the production of microalgae, resulting in >100 times more efficiency (than palm oil) and approximately 40 times more efficient than pond algae.
- Regaia Energy is the world's first (and only) International Sustainability & Carbon Certification (ISCC) certified Algae cultivation company with the proven economic and commercial viability of crude algae oil production with its on-site electricity powered by its own algae biofuel. Regaia Energy has secured >US\$50B in purchase agreements due to its super cost-efficiencies.

ALGAE ABSORBS 400X MORE CO2: LARGEST MAN-MADE CARBON SINK WITH HONEYCOMB POOLS

- On average, algae is up to 400 times more efficient than a tree at removing CO₂, grows 10 times faster than land plants, and uses 10 times less water. Algae oil is an ideal feedstock for blending with fossil fuel to power cars, trucks, trains, and planes, which can be produced commercially to accelerate decarbonization and alleviate global warming.
- Approximately 50% of Algae biomass is oil and the remaining is a dry cake that can be eaten like seaweed or made into non-toxic biodegradable bioplastics.

GLOBAL ADOPTION OF BLOCKCHAIN: \$FIX

- Promise Land Pte Ltd is the mandated lead advisor while Finamatrix.NET is the designated tech partner with specialization in blockchain and is the #1 NAS100 risk-tech database since 1985, providing the [#1 ESG cryptocurrency \\$FIX](#).
- \$FIX is the world's first and only crypto-verified ledger for crude algae oil prices and will have expanded utility and network values from further partnerships with leading crypto companies and energy/financial institutions.
- Finamatrix.NET offers free memberships while paid members receive \$FIX. Finamatrix.NET will use the proceeds to invest in Regaia Energy to boost production to fulfill the growing demand, and for further tech enhancements.
- An LPoS blockchain allows users to "lease" their tokens to full nodes and earn a percentage of the payout as a reward which has an extremely low carbon footprint as compared to Bitcoin mining.
- Crude algae oil price (per metric ton or MT) recorded on the blockchain provides a base value for \$FIX and reference market value as there are only 50 million tokens versus a scalable supply of algae oil. \$FIX crypto price represents the ex-ante (expected) demand for algae biofuel. See: <https://finamatrix.net/fix/>
- \$FIX provides investors access to DeFi including cross-chain liquidity pools allowing global settlements that gain profit via smart contracts from mining fees, arbitrage, and algo trading opportunities due to inefficiencies and mispricing.

GROW WITH GREEN GOLD TOKENOMICS OF \$FIX

- Public Blockchain: Waves Tech LPoS (Leased Proof-of-Stake ESG-compliant DEX) integrated with Bitcoin (BTC), Ethereum (ETH), Binance (BNB), Tether (USDT), and soon with other major exchanges & blockchains; incorporating the world's first blockchain solution for Crude Algae Oil supply chain & DeFi products (spot, futures, options, and other derivatives) on Crude Algae Oil prices.
- Token Generation Date: 22 Feb 2022
- Token Name & Symbol: \$FIX or \$FiX
- Max Supply: 50M (not re-issuable; token-burn allowed) with 2 decimal places.
- Public Sale: Auction pricing (Sign-up in Finamatrix.NET)
- Distribution Date: via consensus
- Utility: \$FIX is the governance and transaction token for the trillion-dollar supply chain of the #1 crude algae oil producer, providing members global access to DeFi (mining fees, etc) with an increasing number of potential partnerships with Top 50 crypto firms and energy/financial institutions, for eg. IBM, Polygon, and Web3 firms, etc. Potential users of \$FIX include suppliers, licensed manufacturers, contractors, buyers (including oil majors), oil traders, arbitrageurs, hedgers, and speculators of crude algae oil. Weekly, the blockchain will record a verifiable transaction ID, where the transaction volume is equal to the Crude Algae Oil
