

The first 100% Artificial Intelligence Sports Card Grading Company has launched!

Rochester, New York May 10, 2022 ([Issuewire.com](http://www.Issuewire.com)) -

Introducing <http://www.GradeMyCardForFree.com>, powered exclusively by AI! Collectors and investors can upload a scan of a sports card and in 15 seconds receive a grade, subgrades, and reports. The software measures and grades how centered, rotated, and square a sports card is. And soon, it will also measure how sharp the corners and smooth the edges are.

Investors can now have sports cards graded before they even purchase the card. A powerful tool that does a better job than any human could. Best of all, the user can upload an unlimited number of cards for grading and will never be charged a fee!

GradeMyCardForFree will continue to add features throughout 2022. For more information, please visit <http://www.GradeMyCardForFree.com>.
