**Tampa, Florida May 20, 2022 ([IssueWire.com](http://www.IssueWire.com))** - Avoid the rising costs and fears of inflation with this creative strategy that beats the CPI 8.6% rate of inflation. A unique combination that focuses on “safety” and produces 9%-13% rates of return to protect your money’s value from inflation’s eroding effect.

Combining these (3) core elements to produce a safe and effective strategy to beat inflation:

1. US Government-backed for the safety and security of your investment
2. Safety in numbers with over (500) stocks in a market index
3. Lowest risk for producing premiums by selling covered call options

It also uses a tax-free platform for added tax benefits with some compounding of your investment and monthly dividends for optimum cash flow for an unbeatable solution.

“This combination has never been offered before in a unique and safe way that beats inflation and protects the value of your money,” said Gary T. Shorter, author of this new book; Financial Help Guide. “It includes better savings strategies, how to protect a retirement pension (annuity), credit reporting tips and reveals the best-kept secret on Wall Street”, said Shorter.

*“This book has some of the most valuable financial insight I have ever read and it’s a great reference going forward too.”* by Mike M., Chicago, IL

*“Wow! Great information on how I can fight inflation and protect my money at the same time, very useful!”* by Brad O., Tampa, FL

Gary T. Shorter is an accomplished Financial Advisor from Merrill Lynch where he achieved Executive’s Club in 2 years with \$26 Million in assets under management. He understands the good, bad, and ugly investments and what makes a safe investment. He added insurance and mortgage certifications to broaden his expertise. Ref: <http://www.garytshorter.com>
