

Thumbtag: The Best Attendance Management System

Thumbtag provides its clients with the best attendance system that aids in keeping track of the workers on the job site without ever physically visiting the site.

Dubai, United Arab Emirates May 24, 2022 ([Issuewire.com](https://www.issuewire.com)) - (<https://thumbtag.in/>) Thumbtag is one of the most trusted and reliable names for various businesses in their [face attendance system](#). Thumbtag makes use of the latest and most advanced technology to provide its clients with the best product and services that aid in improving their business safety. Thumbtag helps the businesses to keep the track record and attendance of their workers on the construction site with utmost ease and

convenience.

Thumbtag provides the business with real-time information about their workers and equipment, thereby enhancing their productivity and thus leading to better management of both the workers and equipment without ever visiting the construction site. Thumbtag provides the business with all important information about workers' productivity, task time, and many more with the help of a smartphone. The decision-making regarding the manpower can now be made easier with the help of Thumbtag.

Thumbtag delivers its valuable services to the business through the touchless face recognition that records the workers' attendance. This also promotes hygiene and cleanliness compared to other attendance tools. The use of Thumbtag for attendance requires 3-5 seconds thereby leading to the time-saving. Apart from this, Thumbtag also works in offline modes and thereby can be used in remote areas as well.

Thumbtag has so far been used in 137 sites with over 70000 workers registered, thus speaking the volume of the dominance that Thumbtag holds in this industry. Thumbtag has become the most preferred choice for a large number of businesses such as artizen, JLL, CasaGrand, and many more. This is mainly because Thumbtag product has so much to offer to its clients.

Thumbtag is aiming to replace the traditional method of an attendance management system that involves a lot of time, money, and effort by providing the business with a cost-effective product equipped with all the important features. Thumbtag is portable and lightweight but is strong enough to be placed on any construction site. Thumbtag thus provides the best of both worlds to its clients.

Thumbtag also aids the business in keeping track and record of safety audits along with incidents management, thereby leading to better safety management. Apart from this, Thumbtag also generates various standards and customized reports, thereby leading to better control. Thus there is no doubt that Thumbtag is the best attendance software in today's time.

About the Company: Thumbtag is enabling the best safety measures to the business by providing them with the right management system that records, track, and report the workers on the construction site. With the use of Thumbtag, all the important information is made available to the clients at their fingertip, thus offering them maximum comfort and convenience without ever compromising on the quality. Thumbtag is indeed the more effective way to keep track of the workers, and this considerably lowers the burden on businesses to keep a large number of paper records. Thumbtag has become high in demand because of its amazing product features, thereby making it the most preferred choice for various big businesses such as artizen, JLL, CasaGrand, and many more.
