

UberJets Helping Flyers Get North!

West Palm Beach, Florida May 24, 2022 ([Issuewire.com](https://www.issuewire.com)) - In 2022 consumers have the freedom to purchase, order, or reserve, practically anything with a click of a button. Buying has never been more transparent through the utilization of mobile app technology. Typically, users can perform tasks such as book a hotel or purchase game tickets all from an app; so it only makes sense that one can order a private aircraft to get anywhere, and anytime using the UberJets LetsJet App! UberJets puts the power of a corporate flight hangar in the palm of your hand. You can now reserve a completely customized private aircraft as easily as ordering a pizza...

UberJets multi-tier platform allows the private flyers to select the exact year, make, and model aircraft -always at a single leg pricing. *"UberJets innovative flight optimization technology gifts Jetters their own Virtual Hangar, with up to 3500+ unique aircraft. Our team is constantly redefining how AI flight automation can be improved in order to present competitive pricing, with top-notch service and satisfaction to our Members,"* says Jackson Cavallerano, UberJets VP.

Private flyers' needs are ever-changing, and they value freedom and flexibility today more than ever. We firmly believe in the simplicity every private flier should enjoy, that's why we've trademarked the ability to partake in *Jetting Made Simple!* It should be straightforward to book a private jet in today's booming technology market, but sadly that is not the case with legacy private jet services. Thankfully, UberJets has introduced its Virtual HangarSM to give their Let'sJet App users a wide variety of aircraft options at different price points. It has truly never been easier booking a private aircraft using UberJets technology. Unlike other jet-share programs, jet cards, and fractional ownership, an UberJets Passholder is in complete control of their travel plans, giving them the simplicity of booking on the industry's most advanced aircraft and technology platform.
