

Vina Love's new single " My City" is streaming everywhere!

New York City, New York May 17, 2022 (Issuewire.com) - There was magic in the air on Friday the 13th to Vina Love's fans and followers! Vina Love's latest sensational hit "My City" hit the airwaves with a bang! The Princess of Harlem's newest released track has already made an impact on every independent woman it reaches.

The title is about Love as she makes a more than understandable argument that she won't settle for less so if a man wants her, then her city is the one worth flying to. Her man is expected to know her worth and make the effort to hop on a plane and experience the city with her. She makes it clear in her record that she is the prize and her man has to win it.

Love is originally from Harlem, New York, hence the title. She is the daughter of none other than legendary DJ and rapper, Kid Capri. Though she came from royalty, she has made it her goal to make it into the business independently. She is determined to create a name for herself that extends beyond being the daughter to an icon.

Vina has performed alongside some of today's top performers including Megan Thee Stallion and The Lox. She graced the stage with songstress Ashanti, rapper Ja Rule, and mega-producer Fat Joe. She captivates the crowd no matter where she goes, leaving audiences enamored by her glamor and talent.

Always the businesswoman, Love had taken up residence in the music label business when she created her own, Amore Love records. She refuses to take a backseat and has instead chosen to drive her own bus. This venture is admirable for a young woman in a business full of older men. Her decisions are always heard and the fantastic results show in her work.

Love isn't just a musical genius, she is also a fashion icon. She is typically shown in fashions others wouldn't dare to wear. Her confidence makes her desirable to countless designers who hire her to work their runways.

Her hit "My City", set to be a major anthem for the city girls this summer is streaming on all digital platforms. Be sure to download your very own copy and tell that man he better pack his bags and book that flight to YOU. Follow Vina on social media @vinalove
