

A Multitude of Preparations for the New Trade Finance World

Yodapplus is a leading blockchain development company that is providing modern-day solutions to traditional problems

Rochester, New York Jun 13, 2022 ([Issuewire.com](https://www.issuewire.com)) - Yodapplus is a leading blockchain development company that is providing modern-day solutions to traditional problems. With the passing years, we have garnered a great deal of experience reinventing things in the blockchain way.

Our continuous research and development have led to the creation of the first-ever Asset Tokenization Platform that will revolutionize the financial industry. This white-labeled solution is built to solve the liquidity issue arising due to the lack of a proper forum for borrowers and lenders to meet. The elimination of intermediaries will further lower the cost of transactions for buyers and sellers. The asset tokenization platform will enable issuers to generate, issue, and manage tokens that are immutable, regulatory-compliant security tokens.

“We are delighted to share this innovative [asset tokenization platform](#) with the world to empower the trade finance sector. As the popularity of asset tokenization is gaining momentum, it is expected to turn the tides for the indulging candidates,” said [Vishrut Srivastava](#), the CEO of Yodapplus Technologies.

The platform features trustworthy options to easily onboard on-chain actors, tokenize assets, and provide access to a global pool of investors. The KYC/KYB and AML features ensure the much-needed transparency and trustworthiness required by all its users. The platform also encompasses the ability to set regulatory and custom restrictions on the tokens along with the easy settlement of token issuance and redemption. The collateralized token offering along with default handling by smart contracts makes the platform all the more a necessity in transactions pertaining to trade finance.

“This white-labeled solution will take care of all the needs of the issuers & investors,” said Nilesh Pathak, the CTO of Yodaplus Technologies.

With continuous innovation and constant expansion, the asset management industry is observing a drastic change in the way it used to operate. The tokenization platform is dedicated to the faith that any investor puts in the system. If treated with care and wisdom, it will lead to a better future.

About Yoda Plus

Yodaplus is a NextGen Solutions provider helping organizations to scale up their technologies to become Smart Enterprises. Our **expertise in blockchain technology** has led us to build intelligent business solutions that are helping the XDC community across the globe.
