

Arvia, pioneering integrated Smart Classroom learning technology

Classrooms across the globe are integrating smart board technology in order to facilitate a more interactive and engaging learning experience. Arvia as the forefront of this movement has implemented the solution in BIM Lab, Universiti Putra Malaysia.

Selangor, Malaysia Jun 8, 2022 ([Issuewire.com](https://www.issuewire.com)) - Israk Solutions Sdn. Bhd. has completed a deployment of a [smart classroom](#) solution that complements the usability of the **BIM Advancement Lab at Universiti Putra Malaysia (UPM)**. The lab, being the first in Southeast Asia was established in collaboration with Bentley Institute, a United States-based construction, and infrastructure development software company, and is expected to become the pioneer in the preparation of teaching and learning courses of international standards for the construction industry.

Offering a fruitful blend of technological advancement and evolved education system, the brand Arvia is creating a revolution with its products and services for a cost-effective integrated [smartboard in classroom](#). This renowned company helps to integrate an evolved learning technology that includes an interactive display, specially crafted software, advanced audience response technology, listening devices, networking, and the list goes on. The interested organizations and individuals can avail of

everything under the common shade of this company.

Dr. Aidi Hizami Bin Alias, the Head of UPM-Bentley BIM Advancement Lab, said, *"Very good experience with Arvia in upgrading our UPM-Bentley BIM Lab to become an online lecture streaming system and smart classroom. Very friendly and knowledgeable. Highly recommended for IT and smart classroom work!"*

The company has installed an **Arvia Smart classroom Solution** at the organization with multiple technologically advanced devices and software. It includes Arvia interactive smartboard, PTZ auto-tracking camera, display control device, conference room laser projector, wireless conference system, a fixed-frame projection screen ALR, and sound system. With such efficiency, the UPM-Bentley BIM Lab greatly benefitted and that reflects in their response.

Stepping ahead in the aspects of digital transformation of the education system, Arvia helps create a diversified classroom that is more fun and engaging. The agency offers easy-to-use classroom setup devices and tools to provide an enhanced learning experience for all. With interactive whiteboards, smooth communication programs, real-time data, sharing notes, and many other effective options; the agency is redefining the education system. With a genuine ambiance and learning environment, the students can gain more knowledge at ease while cultivating their passion. The online functioning classroom is truly a game-changer in the field of remote learning. The global pandemic and its effects have made many educational institutions shift from offline classes to the online education system. With this latest technology of smart classrooms, remote learning has become even easier and allows more number students to take a part in it without the barrier of geological location.
