

Benchmark Continues to Raise the Bar for Biopharmaceutical Manufacturers by Launching Custom Single-Use Systems

Biopharmaceutical manufacturers are assured of expert design, engineering, and quality from the Life Sciences supplier.

Buffalo Grove, Illinois Jun 2, 2022 ([IssueWire.com](https://www.issuewire.com)) - Benchmark Products, Lincolnshire IL; a leading supplier of cleanroom product solutions for the Life Science industry, has expanded its frontiers as they launch a new division- Benchmark Bioprocessing Solutions- with an accompanying move into a significantly larger distribution center and ISO 7 cleanroom manufacturing operation.

Benchmark Bioprocessing Solutions (BBS) now offers custom design and engineering of single-use fluid handling systems, collaborating with clients from concept to final design while leveraging an open-architecture model for vertical integration. Custom assemblies from BBS increase efficiency and reduce risks in biopharmaceutical manufacturing, ensuring product integrity and maximum yield.

Tom Caffery, the CEO of Benchmark Products, had this to say about the progress of the company: “The company has built three cleanrooms and has the capacity to add five more with the aim of accommodating the expected growth from designing and producing high-quality fluid handling single-use systems for biopharmaceutical manufacturers.”

To support sterile fluid transfer in the upstream, downstream, fill, and finish process steps, BBS offers a complete line of single-use components, connections, and assemblies. The company also aims to overcome current supply-chain challenges by combining its nearly 30 years of inventory management experience to establish safety stock for clients’ critical systems.

About Benchmark Products

Benchmark Products was founded in Illinois in 1993 to supply innovative solutions and products that help life science manufacturers deliver a continuous flow of high-quality therapies to patients. The company is committed to exceptional quality and is proud to be ISO 9001:2015 certified, along with state-of-the-art ISO Class 7 Cleanroom facilities on site. Over 500 life science customers rely on Benchmark for value-added services such as custom kitting, single-use fluid handling assemblies, product irradiation, and sterile product quality assurance.
