

Blockpour - The DeFi Data Aggregation and Analytics Platform Announces Seed Round Led by Industry Partners

Blockpour is set to bring its unprecedented speeds and multi-chain data analytics to retail and enterprise clients

Singapore, Singapore Jun 9, 2022 ([Issuewire.com](https://www.issuewire.com)) - [Blockpour](#), multi-chain data aggregation, and analytics platform - today announced its seed round funding. The round included participation from several key investors and industry verticals, including listed gaming company [WeMade](#), [GS Futures](#) - an early-stage corporate venture arm of the Korean conglomerate GS Group, crypto VC [Kestrel 0x1](#), Layer 1 [Algorand Foundation](#), next-generation cross-chain oracle solution provider [Supra Oracles](#), in addition to a collection of other supported funds, companies, and individuals. The round raised approximately \$3.3 million in total funding.

"With WEMIX, a proven utility coin, and WEMIX\$, a 100% fully collateralized stablecoin as its basis, we will launch our own mainnet WEMIX3.0 with DAO-based NFT platform NILE and various DeFi protocols. With the open platform WEMIX3.0, we intend to roll out an omnidirectional partnership ecosystem throughout the world. We believe this investment in Blockpour, the innovative DeFi platform, will create a meaningful synergistic impact on both parties' blockchain business." - **Henry Chang, CEO of Wemade**

Blockpour aggregates metrics from DeFi applications across all supported networks in one dashboard, allowing users to explore and access otherwise siloed price and liquidity movements and discover opportunities. Currently, Blockpour supports the Ethereum, Fantom, Avalanche, and Polygon (POS) networks and will quickly integrate additional EVM and non-EVM-based chains.

*"Blockpour is an innovative DeFi platform that brings real-time decentralised data across multiple networks for users to view, compare, and track token data. We're excited to be part of the Blockpour seed round investment and support them on their journey to expand their integrations and product offerings. Blockpour will initially offer a better DeFi user experience through advanced multi-chain data analytics, which will be extended in the future to cover other growing verticals including NFTs, social and GameFi". - **Daniel Oon, Head of DeFi, Algorand Foundation***

The closure of the seed round marks the start of a new expansionary phase of Blockpour's journey where it will expand its chain integrations and product offerings. These will include more advanced data analytics, portfolio management, and unique features such as cross-chain order routing for best price execution via a paid subscription service.

*"The support we received from investors bolsters our vision and paves the roadmap to expand our products & become a leading source of multi-chain data analytics" - **Brayden Abick, CTO & Founder of Blockpour***

Blockpour also will look to quickly expand coverage over other growing industry verticals outside of DeFi such as GameFi, NFTs, and social.

Finally, Blockpour plans to launch its enterprise service to bring institutional clients lightning-fast multi-chain DeFi data as soon as Q3.

*"Blockpour is ready to power the next wave of enterprise DeFi adoption with its unique combination of comprehensive multi-chain data, lightning-fast speeds, and a sleek UI/UX." - **Nabil Manji, Head of Crypto & Web3 at Worldpay from FIS***

Blockpour also announced that it will be partnering with TOKO, a digital asset creation engine, to tokenise Blockpour's cap table for investors as Blockpour looks to truly embrace Web3 technologies and the potential that it unlocks.

About Blockpour

Blockpour is a multi-chain data analytics platform that provides traders with the tools and metrics they need to navigate the world of DeFi. Crypto traders can leverage Blockpour's next-to-real-time multi-chain data feeds and intuitive interface to identify trends across DeFi and discover their alpha.
