

BOOM! The MM72 crypto scores + 11,756%. Great performance, in countertend with the market

Crypto generally mark a moment of strong crisis, confirmed by the collapse of Ethereum. But there are some exceptions in clear countertrend. MM72 on 18 June marks a + 11.756% record rise and is Coingecko's Absolute Top Gainer.

Singapore, Singapore Jun 18, 2022 (Issuewire.com) - It seemed that the race of the MM72 team, which closed 5 listings in just one month and made people talk about it all over the world, feeding a community of fans of the project, had stopped.

Capitalization at the lowest terms, a price that had six zeros since reaching the dollar in value. [MM72](#) in recent days has been a delicious bite for the most discerning investors who have taken advantage of the collapse in the price to fill their wallets with hundreds of millions of tokens.

And they were right. With an increase in value of + 11.756% recorded, on June 18 MM72 is by far the best performing Crypto in the world. And almost certainly not a few will want to collect the result of the increase in value of MM72 and therefore another depreciation of the token is almost certainly expected soon. The Crypto has reserved considerable pleasant surprises and has repeatedly shown that the investment can be really profitable if you have the patience to wait for the right moment.

MM72 is a Bep-20 token, mined or on the Binance Smart Chain, the symbol of the homonymous project which aims to soon release an innovative swap that allows the conversion of junk coins with a multiplier effect from 10 to 100 times the value found on any swap dex.

A few days ago the AMA (Ask Me Anything) event was attended by the Chief of Marketing of the MM72 project, organized on the [ZT Global - Coinbetter](#) Telegram Channel, the well-known Singapore exchange, and attended by over 20,000 people. Many questions have been asked and to which Mr. Melly has been able to give wise feedback.

However, the AMA revealed that the innovative swap would have been ready for about a fortnight and is simply waiting to be implemented on the new website under construction.

The token is therefore part of a long-term project and we are confident that it will not fail to reserve further notable performances.
