Hong Kong, Hong Kong S.A.R. Jun 15, 2022 ([IssueWire.com](https://www.issuewire.com)) - ClevGuard recently announced the updated version of their groundbreaking parental monitoring app - [KidsGuard Pro for Android](#) with a new distinct mission to help parents and companies to keep a watch on their kids, partners, and employees' mobile phones activities. Through advanced integrations and leading technology, KidsGuard Pro has modern features like keyword alarm, sound, and screen recording to provide an ultramodern monitoring experience.

For decades, KidsGuard Pro for Android has been one of the most trustworthy tracking apps that provide instant updates about target users' whereabouts with real-time data syncing. Its multifunctional technology has been a great assistant for parents, companies, and other people to keep a watch on their kids, employees, and partners respectively. To ensure more detailed monitoring information and a better user experience, KidsGuard Pro for Android 4.1.0 has been upgraded with exciting new features:

Surround Recording: A new environmental sensing feature has been added to the software that allows the user to record the surrounding environment of the target device. With this feature, users can record the sedimentation or humidity level of the target device area.

Screen Recording: Previously there was only an option for taking a screenshot of the target device screen. But now with KidsGuard Pro 4.1.0, this latest update users can also record the screen activity in MP4 format for up to 60 seconds.

Keyword Alarm: This is another existing feature of KidsGuard Pro 4.1.0. Users can set up to 15 keywords on the target mobile device. Once set, KidsGuard Pro will check each incoming text and message against these keywords and give an alert if found any matching words.

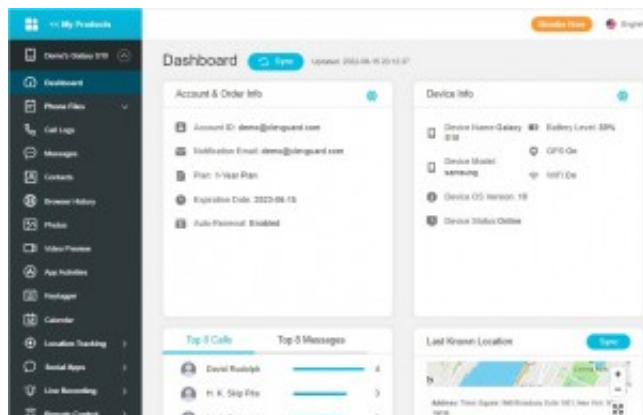

Call Recording: The latest version provides improved call recording with more detailed information.

Email notification: Users can also get an email notification with real-time data syncing to get more updates.

With these outstanding features, now KidsGuard Pro has become more productive and beneficial. It is making the monitoring experience better and more joyful than ever. Now KidsGuard Pro is available at [ClevGuard's](#) official site for download and installation.
