

Digital Art is in the Air : Panda-NFT Builds the world's leading trading platform for NFT digital collections

Panda-NFT Marketplace supports the trading of digital collections and is similar to a digital collection "exchange", fully igniting the entrepreneurial passion of digital collection players at home and abroad.

Dover, Delaware Jun 2, 2022 ([Issuewire.com](https://www.issuewire.com)) - As the global digitalization process accelerates, blockchain technology matures, and the NFT trading market exceeds \$100 billion in volume, NFT is attracting technology giants and capital to enter the market. Panda-NFT is the world's only DAO

autonomous NFT decentralised digital collectibles trading platform, combining the qualities of Defi + DAO + NFT to provide liquidity for the platform tokens and all other blue-chip tokens, as well as to The platform not only provides liquidity for the platform tokens and all other blue-chip tokens but also conducts digital creation, minting, display, trading and auction of NFT for global users. Relying on blockchain traceability, the collection minting chain leaves traces, traceable sources and traceable records, with credible copyrights. All types of creators can own exclusive NFT digital collections on the platform and realise the value of their creations.

Looking at the global crypto NFT digital collection trading market, it is not difficult to find that some well-known domestic and foreign enterprises such as Alibaba, Tencent, Baidu, Facebook, eBay, LINE and other Internet enterprises, or consumer enterprises such as Xiang Piao Piao, Nespresso's tea, Coca Cola, Disney and McDonald's have entered the crypto NFT art field, grasping the NFT digital collection dividends and enlisting large-scale copyright holders, build shopping malls and carry out uplinking operations.

Wei Pengju, President of the Institute of Cultural Economics at Central University of Finance and Economics and Distinguished Professor of Longma Scholars, said, "In the long run, digital collections will become an important carrier for renewing cultural and cultural heritage and promoting a new wave of promoting traditional culture." The new form of digital culture represented by digital collections not only enriches the diversity of the crypto-art field but also exposes more users to this new era of digital art, effectively becoming a new dynamic force to promote high-quality and innovative development of

art and culture. Panda-NFT believes that NFT is the bridge between the real world and the metaverse and that the future potential of NFT and the metaverse is one of the areas that has not yet been fully explored; the digital collection of NFT, with its immutability and clear traceability, is perfectly suited to the needs of reality and will certainly become an important medium for breaking the circle. Art knows no borders, culture has consensus. The opening of the Panda-NFT digital collection trading platform allows creators from all over the world to publish music, tickets, hipster games, cards, paintings, photography, GIFs, emojis, etc. as digital collections to create value, and in addition to this, the platform will also integrate various new contents such as social networking, auctions, blind boxes, auction requests, VR collection rooms, VR museums, etc. to attract more insiders and blockchain enthusiasts to Join.

The future is a digital world where everything is on the chain. Panda-NFT, as a digital creation trading platform that anchors digital collections to physical rights and interests, supports the trading of digital collections and is similar to a digital collection "exchange", fully igniting the entrepreneurial passion of digital collection players at home and abroad. The launch will certainly be of great interest to NFT digital collectibles enthusiasts around the world, so stay tuned.
