Bannur, Karnataka Jun 18, 2022 ([Issuewire.com](https://www.issuewire.com)) - EduCtrl Education Consultancy CRM by Sash Info Services

Sash Info Services, a Bengaluru-based software product development firm, has announced the launch of a SaaS product called 'EduCtrl.'

EduCtrl is a management software designed for education consultants and coaching centres. It aids in the simplification of education consultancy day-to-day business processes and the tracking of business performance. It includes comprehensive management features, a student/user panel, and a trainer panel for managing coaching/training.

Running an education consulting business entails a variety of activities. To manage the business more

efficiently and provide good services to clients/students, a good and powerful software system is required. EduCtrl Software is the ideal solution for these needs. It is cloud-based software, which means it does not require installation and can be accessed through a web browser. The software is available at a reasonable monthly/yearly subscription fee.

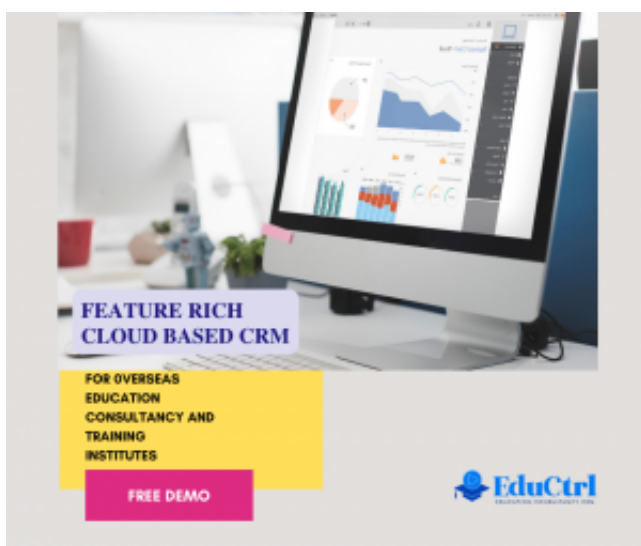

Education CRM software offers the convenience of marketing automation to education consultants. As a result, education consultants can leverage the power of marketing automation to extract information and reach out to students. Moreover, education CRM software helps education consultants to reach out to potential customers via social media platforms. Thus, they can collect the most updated information about prospects with ease.

A cutting-edge CRM software program can make the whole task a lot easier for education consultants to help them take care of the other aspects of the consultancy business. That is why education CRM software becomes an integral part of the education consultancy business.

Checkout their website for more details and information. Sash info services is a reputed IT company that focuses on providing expert website development, app development, and digital marketing services for its customers.
