

Go more places with a durable, wallet-sized VaxCard

VaxCard is a valid wallet-sized, waterproof card with an exact image of your original CDC COVID-19 vaccine record, made in the U.S. for Americans.

Atlanta, Georgia Jun 25, 2022 ([IssueWire.com](https://www.issuewire.com)) - As requirements to show proof of your COVID-19 vaccination become more common at destinations and venues across the nation and for international travel, many Americans are looking for a turn-key solution to help them preserve and protect their original U.S. Centers for Disease Control and Prevention's COVID-19 vaccination card. Enter the VaxCard: a valid wallet-sized, waterproof card with an exact image of your original CDC COVID-19 vaccine record, made in the U.S. for Americans.

Nearly two-thirds of vaccinated Americans carry their vaccine card with them all or most of the time as part of their day-to-day routine, according to a survey by a national research firm. With the VaxCard, those vaccinated Americans can leave their original card at home in a safe place. This was the biggest concern among respondents in the national survey (34 percent). A secondary issue was being able to have a durable, portable version when needing to prove vaccination status (26 percent).

The VaxCard is made of composite material to make it long-lasting and waterproof. Ordering the VaxCard is a quick and easy process that can be done on any smartphone with a camera. Customers

submit a picture of their original vaccination card using VaxCard's secure scanning tool and then see a preview of their VaxCard before they complete their purchase online. The card will be delivered by mail within two weeks. The VaxCard sells for \$9.99 plus shipping. Go to <https://vaxcard.com> for more details or to order a card.
