Glad to share My Book, India's first Thanglish Book.

“White Thought in a Black Shadow - *Flip the Mirror That You have Not Seen*”

This book helps you to know who you are, what you are, and where you are.

I'm not given any solutions for the problems in our life, I tried to convey some facts that we did not notice in our lives.

Grey matter in our central nervous system helps us control movement, form memories, and express emotions. White matter is a subcortical element and is responsible for sending messages far and wide at record speeds. Now you have an idea what this book is about. Yes, the author has analyzed the functions and origin of thought. He has done it like no one else has.

This book is written in a combination of Tamil, an ancient language, and English, the most ubiquitous language in the world. Interestingly, the author has decoded the connection between words, thoughts, and emotions.

The purpose of this book is to help readers answer the ultimate question – “Who Am I?” Rene Descartes said, “I Think Therefore I Am.”

The book is available at Notion Press, Amazon, and Flipkart.
