

Interactive Smartboard powered by ChromeOS, changing the future of Smart Classroom

Selangor, Malaysia Jun 23, 2022 ([Issuewire.com](https://www.issuewire.com)) - Israk Solutions Sdn. Bhd. has announced its new generation of interactive smartboard which now is powered by ChromeOS. The smartboard with ChromeOS, being the first in the world and assembled in Malaysia, is expected to become the pioneer in the digital classroom and become a standard to be followed in local and worldwide education institutions.

The brand Arvia is revolutionizing education by providing a beneficial fusion and integration of a high demanding operating system, ChromeOS is an advanced technology in the smartboard. This fastly-emerging operating system is all about simplicity; works fast and boots up in mere seconds. Because of its simplicity, ChromeOS is much more secure than others with frequent and automatic ChromeOS updates available and built-in virus protection.

Mohd Khamarul Idzwan bin Othman, *Leader of Google Educator Group Malaysia and the Asia Pacific*, after using the product during a visit said, "The usage of Arvia Smartboard with ChromeOS is parallel with the latest educational technology trend and Industrial Revolution 4.0. With a large screen and smooth annotation capability, it offers a perfect teaching experience ."

This innovation is complementing the initiative of the Ministry of Education (MOE) in the G Suite Enterprise for Education (GSEfE) subscription service that starts from July 9th, 2021 until July 6th, 2024 for all the schools under MOE. The G Suite Enterprise for Education is a full-featured, ChromeOS user-friendly productivity suite such as Google Meet, Google Drive, and Jamboard which enables schools to fully utilize the smartboard to meet their needs.

The smartboard is revolutionizing the educational system with easy-to-use communication tools, real-time data, note-sharing, and many other useful features. The students may study more easily while pursuing their passions in a real-life learning environment. Many educational institutions have switched from a traditional learning environment to an integrated centralized learning environment as a result of the worldwide pandemic and its impacts.

"Our new generation of Arvia smartboard for a classroom with ChromeOS is designed to provide users with the best possible experience using Google Workspace for Education. Among the key features are responsive touch capability on any Google apps, teachers can choose from thousands of apps in the Google Playstore and the system will be updated automatically," said Najib Habeb, Managing Director of Israk Solutions Sdn. Bhd.

This organization works to encourage educational innovation, paving the road for smart courses and educational technology. A wireless collaboration system, audio and video studio with a PTZ camera, webinar management system, display management system, lecture tracking, and recording system, and more are all examples of [smart classroom](#) technology.

These smartboards can be included in customized smart classrooms, including the basic package, which can accommodate up to 10 students, the standard package, which can accommodate up to 20 students, and last but not least, the advanced package, which can accommodate up to 30 students. The features and price structures of each of these packages vary.

Known for its trustworthiness and dependability, Arvia also supports the use of smart classrooms and provides seamless chances to educators all over the world by providing carefully selected and personalized learning materials. While playing a crucial role in contemporary enterprises, smart and advanced technology is embracing greater variety. With its sophisticated technology, extensive expertise, and ten years of industry experience, the agency continuously expands the spheres of cooperation, communication, and customization.

Starting from [Digital Signage](#), [Video Wall](#), [LED Display](#), [Touchscreen Kiosk](#), [Smartboard](#), [Video conference](#), and live streaming to smart classrooms; the agency provides a complete solution for audio-visual technology. Hailing from Malaysia, this organization only offers high-quality and prestigious solutions that can adapt to every situation. Arvia offers 100% transparency and satisfaction to its clients as the agency aims to empower the world. Get to know more at <https://www.israk.my>.
