

Metline Pipe Fittings ISO certified manufacturer of steel pipes, fittings, flanges

Metline industries is India's most trusted manufacturer, exporter and supplier of stainless steel tubes, carbon steel pipes, alloy steel pipes, mild steel pipes, galvanized steel pipes and black steel pipes in both seamless and welded forms

Mumbai, Maharashtra Jun 22, 2022 (Issuewire.com) - [Metline](#) is one of the largest pipe fittings manufacturers in India with manufacturing facilities in India and China. All our products are manufactured and inspected strictly in compliance with international standards such as ASME/ASTM,

API, NACE, MSS, ISO, EN, AD2000, BS, JIS, and GOST. We manufacture various seamless and welded pipe fittings including elbows, tees, reducers, caps, and bends as well as forging [fittings and flanges](#). These steel pipe fittings are widely used in nuclear power stations, power plants, shipbuilding, paper manufacturing, pharmaceutical plants, oil refineries, and natural gas pipeline projects.

With a collective experience of over 30 years, METLINE specializes in manufacturing welded and seamless [buttweld fittings](#) and forged fittings, such as carbon/stainless steel elbows, tees, reducers, caps, pipe bends, dish ends, and pipe sleeves as per ASME/ASTM, DIN and other known specifications.

These steel pipe fittings are widely used in nuclear power stations, power plants, shipbuilding, paper manufacturing, pharmaceutical plants, oil refineries, petrochemical plants, and natural gas pipeline projects. We are always focused on providing high-quality and high-performance alloy steel fittings, carbon steel fittings, and stainless steel pipe fittings solutions for small fabrication projects and large-size turnkey projects.

Our increasing list of customers includes domestic and international end-user companies, international traders/distributors, as well as pipe fittings traders and suppliers based in India.

Stainless steel elbows and stainless steel bends used in pipeline systems in various industries are available in a variety of shapes and sizes. Besides, we also can produce other non-standard sizes 100% X-Ray welded stainless steel pipe fittings and carbon steel pipe fittings as per technical drawings provided by our customers.

One of our key strengths is to manufacture and supply high-quality long radius elbows, double flanged pipes, piggable bends and large diameter fabricated pipes in stainless steel, carbon steel, alloy steel, and nickel alloy grades. Our long radius stainless steel bends and carbon steel bends are of high quality and high performance, with minimum wall thinning rate and ovality and with no wrinkles.

The wide range of products offered by us includes industrial flanges, duplex fittings, copper-nickel fittings (cupro-nickel fittings), 310S fittings, 904L grade fittings, large and small size dish ends, piggable bends, double flanged pipes, ferrule fittings, investment casting fittings, and large diameter fabricated pipes. Custom shape and forged circles, rings, and steel-cut pieces can also be produced and supplied to our customers on demand. We have vast experience in cutting and threading pipes and can meet your special length, special finish, and special threading requirements.

As a dedicated supplier, our stainless steel pipe fittings are trusted by well-known domestic companies. We also export stainless steel pipe fittings, industrial flanges, and fabricated stainless steel pipes to various countries and regions such as the United States, Europe, Russia, Turkey, Malaysia, the UAE, Saudi Arabia, Iran, Brazil, Chile, Mexico, South Africa, Jordan, Tunisia, Vietnam, Indonesia, Thailand, Singapore, Colombia, and Sri Lanka.

METLINE is one unique and high-quality supplier from which a company can source their entire pipe, fittings, flanges, and fastener requirements within time and budget.

An ISO 9001:2008 Certified Company, Metline Industries ([Sheets, Plates, and Coils](#) Division) is a leading stockholder, processor, and supplier of high-quality stainless steel plates, stainless steel sheets, stainless steel coils, stainless steel strips, alloy steel plates, special alloy plates, mild steel plates, mild

steel coils, hot-rolled coils, hot rolled plates, cold rolled coils in Mumbai, India.

As one of the biggest stockholders, service providers, and steel processors in India, we can offer stainless steel coils, stainless steel sheets, and stainless steel plates at the best prices, quality, support, and quick delivery time.

Our stainless steel coils, stainless steel sheets, and plates are available in 5 finishes: Hot rolled no.1 mill finish, 2B (industrial finish with no grain), #4 (polished finish with grain in one direction, also known as Matte finish), #8 mirror (mirror polish, highly reflective finish with no grain) and bright annealed finish.

We offer stainless steel coils, stainless steel plates, and stainless steel sheets in a thickness range of 0.15mm to 100mm with widths of 1000mm, 1250mm, 1500, and 2000mm mainly in stainless steel 201, 430, 431, 439, 441, 304/304L and stainless steel 316L grade. METLINE stocks a wide range of stainless steel plates and stainless steel sheets in 304/304L, 316/316L, 321/321H, Duplex, 310S, 317L, and 347H grades.

We are suppliers of stainless steel sheets, stainless steel plates, and stainless steel coils in a wide range of grades in 200, 300, and 400 series and in various finishes including BA, 2B, and hot-rolled with or without surface protection (PVC coating). Our stainless steel plate and coil products are supplied along with relevant material test certificates, and mill certification as per EN 10204 3.1, NABL approved lab test reports.

Our stainless steel sheet, stainless steel plate, and stainless steel coil products are widely used across various industries including oil and gas, pharmaceutical, textile, water piping systems, acid and chemical, food processing and beverage, petrochemical refineries, and automobile, cement, paper, and pulp manufacturing.

Stainless Steel Plates, Stainless Steel Sheets, Stainless Steel Coils Stock and Product Range

Stainless Steel Grades: AISI 304/304L (1.4301/1.4307), AISI 316/316L (1.4401/1.4404), 316 Ti (1.4571), 310S (1.4845), 317L, 321, 321H, 904L, AISI409 (1.2083), AISI420 (1.4021), AISI430 (1.4016), AISI439 (1.4510), AISI441 (1.4509), 201, 202 4% Nickel, J4 1% Nickel Materials, JT, SS 204 Cu

Production Process: Hot Rolled Stainless Steel, Cold Rolled Stainless Steel | Specification: ASTM A240/A480

Finish: No. 1, 2D, 2B, BA (Bright Annealed), No.3, No. 4 (Matt Finish), HL (Hair Line), No.8 (Mirror), Both sides finish available, Paper interleave available, PVC/PE Coating

Mills: Jindal Stainless Limited (India), Aperam, Arcelormittal, Acerinox, Thyssenkrupp, Outokumpu, TISCO, Baosteel, YUSCO, MEXINOX, Sumitomo, JFE Stainless, Nippon Yakin Kogyo, DKC Korea, Posco Korea

Thickness Range: Minimum 0.22mm to 8mm (Stainless Steel Coils), 0.8mm – 5.0mm (Stainless Steel Sheets), 6.0mm to 100.00mm (Stainless Steel Plates)

Width: 30mm to 2500mm, 1000mm, 1219mm, 1250mm, 1500mm, 2000mm, 2500mm | Length: 2500, 3000mm, 6000mm, Plasma Cut or Machine Cut Custom Lengths.
