

Ran Lador, MD, an Orthopedic Surgeon with UT Physicians Orthopedics at Ironman Sports Medicine Institute

Get to know Orthopedic Surgeon Dr. Ran Lador, who serves patients in Houston, Texas.

New York City, New York Jun 20, 2022 ([Issuewire.com](https://www.issuewire.com)) - A highly trained orthopedic surgeon, Dr. Lador is affiliated with UT Physicians Orthopedics at Ironman Sports Medicine Institute in Houston, Texas. He also serves as an Assistant Professor in the Department of Orthopedic Surgery at McGovern Medical School at The University of Texas Health Science Center in Houston.

Certified by the Israeli Board of Orthopedic Surgery, he specializes in the surgical care of complex spinal disorders and orthopedic trauma with an emphasis on spinal trauma and tumors, degenerative spinal disorders, revision spinal surgery, use of advanced technologies including navigation and minimally invasive techniques.

Before embarking on his professional journey, Dr. Lador received his undergraduate degree from The Hebrew University of Jerusalem in Israel and graduated with his medical degree from The Hebrew University of Jerusalem Hadassah Medical School. He then went on to complete his residency in orthopedic surgery at the Sourasky Tel-Aviv Medical Center affiliated with the Tel-Aviv University in Israel.

Following his residency, he continued his spine surgery training with a specific interest in the field of spine oncology, serving as a spine oncology surgery fellow within the Spine Oncology and Degenerative Department at the Rizzoli Institute of Orthopedic Surgery in Bologna Italy, one of Europe's and the world's leading spine oncology institutions.

After returning from Bologna, Dr. Lador established a practice as an attending spine surgeon at the Tel-Aviv Medical Center, focusing on complex spine surgery including spine tumors and trauma. During that time, he developed the use of 3D printing technology in complex spine cases. As part of this ongoing project, he implanted the first 3D printed lumbar vertebra in a living patient.

Upon relocating to the United States, he completed an additional fellowship in spine neurosurgical oncology at the University of Texas MD Anderson Cancer Center. He is an active member of the North American Spine Society, the Israeli Academy of Orthopedic Surgeons, and the Israeli Spine Society in order to stay up to date in his field.

Throughout his career, Dr. Lador has authored numerous peer-reviewed journal articles and book chapters on spine trauma, tumors, and 3D printing technology used in the spine. He serves as a reviewer in various spine and oncology journals.

Orthopedic surgery is the branch of surgery concerned with conditions involving the musculoskeletal system. Orthopedic surgeons use both surgical and non-surgical means to treat musculoskeletal trauma, spine diseases, sports injuries, degenerative diseases, infections, tumors, and congenital disorders.
