

Stephanie Poppe, APRN, FNP-BC, MSN, BSN, MT, a Family Nurse Practitioner with Northland Prairie Care

Get to know Family Nurse Practitioner, Stephanie Poppe, who serves patients in Montevideo, Minnesota.

New York City, New York Jun 16, 2022 ([Issuewire.com](https://www.issuewire.com)) - Stephanie is a board-certified family nurse practitioner specializing in functional medicine, holistic care, and natural care, currently serving patients at Northland Prairie Care in Montevideo, Minnesota. She understands that patients' overall wellness is multifaceted and includes their body, mind, and spirit and these three must be aligned in order for them to live their best life.

Northland Prairie Care is a Functional Medicine and Holistic Care clinic focused on individualized and personal root cause healthcare. Each patient is unique in health, genetics, and life experience and they understand this. There is no one perfect way to live and as such, there is no one perfect healthcare answer for patients' concerns. They strive to provide the right answer for the right person at the right time.

Academically, Stephanie has had a passion for holistic care since her journey as a nurse began in 2004. She earned her Bachelor of Science in Nursing degree from the Chamberlain University College of Nursing in 2010, and received her Master of Science in Nursing degree from Clarkson College in 2018.

On a professional level, she has many years of experience in general and orthopedic surgery first assisting, surgical department management, advanced tissue closure techniques, wound care, as well as further training in functional medicine through both the Institute of Functional Medicine and Functional Medicine University.

As a testament to her continued education, Stephanie attained board certification as a family nurse practitioner through the American Association of Nurse Practitioners.

A Board-Certified Family Nurse Practitioner (FNP-BC) holds board certification and provides continuing and comprehensive healthcare for individuals and families across all ages, genders, diseases, and body systems. FNP's maintain patient records, perform physical exams, order or perform diagnostic tests, prescribe medications, develop treatment plans, as well as treat acute and chronic illnesses, conditions, and injuries that fall under primary care.

Happily married, Stephanie and her husband have three beautiful children.
