

Telehealth Care Florida Offers Treatment For Adults With Acute & Chronic Health Problems

Naples, Florida Jun 7, 2022 ([IssueWire.com](https://www.issuewire.com)) - With the increasing shortage of primary care providers, it is becoming more challenging to get doctor appointments when needed and especially on the same day. Dr. Lorie Poston, DNP, NP offers a quality solution to help adults with different ailments via virtual sessions to help diagnose various health issues. It saves time and money to get patients what they need on a telehealth platform. Here are some things to note about Telehealth Care Florida.

[Telehealth Care Florida](#) offers adults treatment for acute and chronic health problems. Dr. Poston believes that holistic wellness is the most important factor for a good life. She's a nurse practitioner with over thirteen years of experience in medicine. Also, she is dual-board certified in Family Medicine and Adult-Gerontology.

Dr. Poston views medicine as an art and believes every individual has unique needs. She does not practice with a typical one size fits all approach because every individual is unique with their own story and personal health goals.

Here are some of the things she evaluates:

- Aches/Pains/Spasms
- Acne/Rashes
- Allergies
- Erectile Dysfunction
- Birth Control
- Hair Loss
- Pink Eye
- Prescription refill
- Food Poisoning
- Flare of a chronic disease
- Insect Bites
- Migraines
- Script for Bloodwork
- Sexual Health
- Sore Throat
- Stomach issues
- Travel Advisory/Preventative Medications/Vaccine Recommendations
- UTI
- Anxiety and Depression

She covers the bases when it comes to natural health options in addition to western medicine. Even with her experience in primary care, she takes those lessons but creates something more personal and innovative with her approach to patient care.

It's a form of health care that doesn't accept insurance but is rather self-pay. Patients can complete card payments via Stripe or Venmo @Telehealthcareflorida. The best thing to do is schedule an online appointment and elect the time needed between 15 minutes (\$34) to 30 minutes (\$59).

Telehealth is a solid alternative for people who don't want to be stuck in an office for hours waiting for a provider. Elders can benefit from this service because they can do everything from their computers. Individuals do not have to drive anywhere or wait for a relative to take them to appointments.

Also, they have a chance to do everything in a setting where they feel more comfortable. This unique health care opportunity creates a custom plan that patients don't get from the typical doctor/patient setting in a routine office.

Not to mention, Dr. Poston genuinely cares about each person she talks to regarding their health concerns. It's a good feeling to have someone who genuinely supports others to help them take care of their wellness.
