

The PMP Custom Molded Foam Process

See what it's like to work with Polymer's PMP division to create a 3D foam solution!

DEVELOPING A CUSTOM MOLDED FOAM SOLUTION WITH PMP

Polymer's PMP division works with OEMs to develop custom-molded foam solutions that improve product performance and streamline production. Here's what it looks like when you collaborate with the experts at Polymer.

YOUR PROJECT COULD BE NEXT!

Newark, Delaware Jun 27, 2022 ([Issuewire.com](https://www.Issuewire.com)) - [Talk to an expert at Polymer PMP](#) and discover that molded foam is right for your needs.

Meet with Polymer to discuss your vision for the best-molded foam solution.

Collaborate with Polymer to create a manufacturable design.

Polymer develops a proof of concept based on your design.

Polymer produces a 3D molded foam prototype part for your product using prototype or production tooling.

Use the prototype in the first validation run and test how the product functions.

Give feedback to PMP to confirm that the product is working as needed.

Finalize design and initiate production tooling.

Launch product.

Next time you have a new product, come back to Polymer at the start of your design process.
