

"Woman Power Club" a new NFT Art Collection by Artist "Websocialinfluencer"

Los Angeles, California Jun 9, 2022 ([Issuewire.com](https://www.issuewire.com)) - History is full of incredible women who have left a mark not only for their talent but also for the messages they were able to send, perhaps even unconsciously at times. Dreamers, visionaries, healthy workers, and independent artists, are the models the just launched new ART NFT project Woman Power Club is referring to, designing to left something to others, even if only an inspiration.

All NFTs have ideas to inspire on issues such as independence, lifestyle, fashion, the way of being, and facing difficulties. Whether they are current or from the past, they all make up a category that can be called “Woman Power Club”.

The artist "Websocialinfluencer" thought of giving life to a project to give voice to this inspiration and spread it through NFT “Woman Power Club” in order to be able to give goodies, pearls, and new horizons to those who, like artists, look at the world with curious eyes and ears always strained in search of ideas with which to face life.
