Discover SecureTech's San Antonio Managed IT Services Solutions

We know that for businesses large and small, IT can be a real challenge to manage. Staying on top of your technology includes controlling the costs associated with keeping in-house staff up-to-date with training, certifications, and current trends. Your Technology Partner MANAGED IT Reliable Managed IT Services San Antonio Best in Class Customer Service

- Backup, Disaster, and Recovery

This includes a device and software owned by SecureTech that will perform image-based backups locally at your office and if chosen, will send the data off-site to our SSAE 16 Type II Certified/SOC Certified datacenter.

- Mobile Device Management

[Software](#) used to manage mobile devices that can secure, deploy policies like App Store regulation, remote wipe, locate, and monitor the device health.

- Encryption

Disk encryption for data on computer hard drives. This software enables us to remotely wipe a hard drive to protect company-sensitive data or provide the proof of encryption at the loss of an asset and there was no data breach.

- Cloud File Sharing

This allows customers to send large files without having to use VPN or FTP. It can be used for large files (training materials, excel sheets, etc.) and is encrypted to support compliance. This can also be integrated into Active Directory and integrate into local file sharing.
