

ATG Learning Academy Receives \$10,000

ATG Learning Academy Receives \$10,000 in Capital Improvement Funds this Spring 2022 for "Education through Enhancing Technology Grant"

Pennsylvania , United States Jul 8, 2022 ([Issuewire.com](https://www.issuewire.com)) - ATG Learning Academy, a licensed 501(c)(3) Private Academic & Neuroplasticity School in Bucks County serving grades first-12th, specializing in cognitive repair for students with learning difficulties.

About ATG Learning Academy

Approximately one in five U.S. children have learning and attention issues that affect their ability to learn in conventional educational settings. Students with learning difficulties, particularly those in the public school system, are often at risk of not receiving the attention and personalized schooling they need to succeed. At ATG, students are taught the way they learn best, allowing them to unlock their full academic, cognitive and societal potential.

ATG Learning Academy specializes in individualized learning and support for children with learning difficulties. The school provides individualized learning in a safe environment, so students with learning

difficulties can achieve their academic goals. As a licensed 501(c)(3) Private Academic & Neuroplasticity School, ATG depends on support from the community in order to provide the best setting for education possible for their students.

Foundations Community Partnership has approved a Capital Improvement Grant (Spring 2022)

Foundations Community Partnership (FCP) is a non-profit, private grant-making foundation established in 2007 to support the behavioral health and human service needs of children, young adults, and families in Bucks County, Pa. In response, the organization provides grants and technical assistance, scholarships, and professional development as well as service-learning opportunities through collaborative partnerships.

Improving Education through Enhancing Technology Grant will be used to replace the current Technology (Window 7 Computers, 2nd hand Tablets, and an archaic student records system) This will allow ATG to upgrade the technology used and even bring in newer software for the students and staff.

What is the goal of the Programs?

“We are deeply grateful for the generous contributions made by the FCP’s programs,” said Kathleen Smookler, Head of School, ATG Learning Academy. “Following the recent move to our Pickertown Road location, we are eager to continue creating opportunities for students with learning differences. These donations are critical to the continued operation of our school and the success of our students.”

Thank you for supporting ATG.
