

Blockchain Comics Announces Launch with Immutable X Marketplace Presale

New York City, New York Jul 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - Blockchain Comics has announced the arrival of Satoshi Master of Disguise (SMoD) on the carbon-neutral Immutable X (IMX) blockchain.

The journey begins with a limited presale launch on the IMX Marketplace on Thursday, July 14th, 2022. Holders can gain early access to a SMoD NFT and be a member of the founding SMoD community.

Following the presale, the minting of 10,000 SMoD NFTs will mark the first phase of Decentralized Publishing – a new era in the history of non-fungible tokens (NFTs).

Harnessing the power of IMX, Blockchain Comics will unleash Decentralized Publishing via the Blockchain Comics Portal.

Decentralized Publishing is an unprecedented utility, which places the distribution power back into the hands of NFT holders.

Through the Blockchain Comics Portal, creators can mint, publish and distribute their own, unique comic series.

Satoshi, the original hero of the blockchain, will kick start this epic comic book series.

Co-founder and Creative Developer 'PaulPaul' said: *"We started with the idea of a comic book being*

created on the blockchain, which could be a parody of the invention of blockchain technology. We soon realized that to do this justice, we would need to innovate technology to create a distribution system that could only exist in the NFT space.”

Furthermore, Blockchain Comics will utilize their new rarity algorithm to integrate multi-layer minting technology.

Essentially, multi-layer minting enables 5 levels of rarity to combine with six different features, allowing for over 15,000 possible combinations.

Regarding SMoD NFTs, the five levels of rarity will be Undercover, Mysterious, Incognito, Nameless, and Ghost. These levels of rarity will combine with six SMoD features: Sky, Location, Head, Body, Mouth, and Eyes.

Utilizing multi-layer minting, Blockchain Comics is able to maximize the utility and scalability of SMoD NFTs.

As a result, SMoD NFT holders can dictate the scarcity of their comic book series. As more characters are introduced, incredibly rare comic books can be spawned as the rarity algorithm works its magic.

Indeed, each comic book will change according to the comic's rarity. As the series progresses and new characters emerge, new variations of the comic will manifest in elements like the artwork and dialogue. The more NFTs owned, the more sophisticated the holder's bespoke comic book series becomes.

Hence, Satoshi will be the founding hero and poster boy for the Blockchain Comics Portal, but he is still trying to evade the clutches of the centralized powers!

More characters lurk in the shadows, waiting for a moment to pounce upon the man behind this revolutionary new concept.

Moving forward in the project, the power of Decentralized Publishing will be in the hands of the community.

Blockchain Comics has ambitious, long-term plans, but those plans won't be possible without a strong, passionate community of blockchain enthusiasts.

That's why the community will always come first for Blockchain Comics. Not only will their ideas be heard, but their votes will determine the parameters of the project.

PaulPaul added: *“The community is key. By making SMoD holders our sole distributors and giving them a vote on the*

parameters of our portal, we are putting them at the heart of this project.”

Blockchain Comics intends to carve out a lasting legacy in the NFT space and that starts with the community.

The man who started it all, Satoshi, is back and he's here to inspire a new wave of ownership, innovation, and creativity in the NFT space!

Co-founder and Project Manager 'Digital Del Boy' said: *"It's no secret that the blockchain has faced troubled times lately. We've created a hero for Web3, who reminds us*

of the true power of the blockchain. It seemed obvious to start the series with Satoshi."

With that being said, look out for announcements on Blockchain Comics Twitter and Discord as the countdown to the launch of the Satoshi Master of Disguise presale on IMX begins.

About Satoshi Master of Disguise

Satoshi Master of Disguise (SMoD) is the first NFT comic series where the story changes based on the features of your NFT. Harvesting the power of Immutable X (IMX) and their exclusive comic book portal, each of the 10,000 SMoD Avatars will generate their own, unique comic book series. Thus, placing the distribution, publishing, and minting rights into the hands of each SMoD holder.
