Many parents have said that they notice their children are falling behind. "Learning can be a struggle. School is not always fun and not every teacher 'gets' your child."

Getting your child on the right track academically can be an uphill battle, but there is hope according to a mom who runs a tutoring agency in Vancouver, Canada. Her experience in education over 20 years has given her information, she says, that can "change the trajectory," of your child's learning potential.
