Hovering under **Angel Air Ambulance**, we at **Air Ambulance Service in Kolkata** transferred millions of patients to and from the health care center on time. We contributed to saving the precious lives of

patients only by shifting them to their desired spots with proper care and caution. We have excellent paramedics, nursing, and experienced medical staff to limit the health complication of suffering throughout the relocation procedure. There are well-designed charter aircraft that come with complete bed-to-bed facilities where we directly take patients from the indicated hospital or home to the desired treatment center of their choice. We always try to provide compromise-free medical amenities in the charter aircraft so that patient does not need to compromise their health throughout the operation.

At [Air Ambulance from Kolkata](#), we always collaborated with trusted brands to get well-furnished charter aircraft for the safest possible operations. We only include well-functioning or state-of-art medical gadgets in the expedition. We use convenient oxygen cylinders, loading stretchers, external defibrillators, nebulizer machines, cardiac observers, spo2 machines, section pumps, infusion monitors, and curative heart rate monitors. We know that the value of life is much more precious than anything that's why we put our fullest potential into the medical transfer of needy patients. We always ensure to provide timely evacuation, which processes with proper care of the patients.

### **Angel Air Ambulance in Chennai** Offers Convenient Charter Aircraft for Transferring Seriously Ill Patients to Clinical Support

A few months back, we had a call from a 61-year-old lady who suffered from a liver infection. He was admitted to the treatment center in Chennai, where doctors referred him to the Kolkata hospital. They had to do so as there is a lack of medical facilities which suit that patient. After listening to that patient, **Air Ambulance Service in Chennai** arranged the well-customized charter aircraft and hi-tech ambulance vehicle. After that, we reached the doorstep of the hospital where the patient was admitted and loaded into the ambulance vehicle. After that, we shifted her to the nearby airport from where the aircraft operated further. Finally, with the support of medical professionals, we relocated that lady to the desired spot in Kolkata on time.

[Air Ambulance from Chennai](#), we have a best friend helpline crew who works to resolve the queries of medically traumatized or user's bookings. Apart from this, we have an excellent crew of telecommunication that helps the users or people with emergencies during emergency transfer bookings. We provide air medical transfer service at a budget-friendly expense so that people with bad financial status can also get an air ambulance in an emergency. Our management medical and help desk team is always working with dedication. They are very responsive to those who come to book an air ambulance for themselves or someone of their lovable ones.
