

DianApps Offers the Blockchain Development Solutions Taking Industries Ahead

Saint Petersburg, Florida Jul 5, 2022 ([Issuewire.com](https://www.issuewire.com)) - Complete blockchain adoption is where the business and consumer world is headed. A sign of this can be seen in the market growth of what is USD 7.18 billion in 2022 to USD 163.83 billion by 2029. The use cases and applications of the technology can be witnessed across a range of sectors varying from traditional industries like Healthcare, Finance to new-age sectors like LoanTech, On-demand, and Automation. Across all these and several other industries, the benefits of incorporating blockchain are more or less the same for every entrepreneur -

- Greater security
- High transparency
- Better traceability
- Increased speed and efficiency
- Automation

While blockchain comes with the guarantee of these benefits, making a product that can back these advantages can be challenging. There is a concerning gap in the demand and supply of expert blockchain developers and the result of this is the inability of blockchain products to reach their potential. What is even more problematic is that developers with limited technical knowledge are only able to build low-quality software which is not even decentralized to a complete extent.

To address this gap several blockchain development companies have come to the surface. One of the most trusted ones of which is DianApps.

About DianApps

Established in 2017 DianApps is a [blockchain development agency](#) that specializes in creating multi-faceted blockchain solutions. The agency has built over 50 truly decentralized software that ranges from cryptocurrency, and crypto exchange platforms to NFT marketplace and smart contracts-based solutions.

What makes the agency a trusted name in the global blockchain space is that the team has worked with multiple use cases across industries ranging from education, and fintech to supply chain-based applications. Moreover, their team comes with an expansive skillset of multiple blockchain languages, tools, platforms, and frameworks, giving them the necessary skills to build multiple use cases.

"[DianApps](#) team helped us conceptualize our blockchain project. We came to them at a stage where we had little clarity on how to approach decentralization. The team sat with us to explain every aspect and how we can add it to our offering, along with the expected benefits it would get us. We are glad that we partnered with DianApps to kickstart our project." - Founder, a blockchain-based gaming app.

The result of this expansive experience and skill set can be witnessed through a strong client base made of names like Uber, Pagarkhata, Newbie, and Vibe, amongst others. It has also gotten them a number of awards and recognitions spanning from -

- [Top Flutter App Development Companies](#)
- [Top Mobile App Developers In Florida](#)
- [Top Flutter App Development Companies](#)

Powered by all these elements, DianApps has become a trusted, renowned name in the blockchain space on a global scale. Know more about the solutions they offer - dianapps.com/portfolio
