Distributing Influence Of Cryptocurrency To The Community As An NFT Game

Metropolitan Manila Area, Philippines Jul 26, 2022 (Issuewire.com) - The creator of Bitcoin Satoshi Nakamoto envisioned a peer-to-peer transaction of digital cash that would allow payments to be sent directly from one party to another without going through a financial institution or third party. It is the starting point of the evolution of future technology. After Bitcoin, different cryptocurrencies have emerged. Throughout the development, people create different projects for the usage of these
currencies. For example, NFTs or Non-Fungible Tokens are financial digital security data stored in a blockchain, which is also a form of a distributed ledger. The ownership of an NFT is recorded in the blockchain and can be transferred by the owner, allowing NFTs to be sold and traded. NFTs can be Art, Music, Video, and the most popular today’s Games. It has a P2E feature that allows the player to earn cryptocurrency and exchange it for monetary value.

In terms of Mecha, this upcoming game has the potential to peek at the future of cryptocurrency. There are so many companies that have been collaborating with other companies to create a decentralized web3 community with their different projects. Polygon, for example, has been adapting projects for the past years, with their low gas fee and Ethereum-based technology.

**Mecha Infinity** believes that everyone can benefit from decentralized technology, including the non-believers of cryptocurrency. There are surprising features of the Mecha community that allows users to become more exposed to this kind of technology. The Impact of this technology is widely broadcasted into different media, so the possibility of cryptocurrency becoming the next big thing will be soon to come.
