

## Electrical Engineering Service - Promageng

Promag Engineering is a full solution for Electrical contractors & Engineering services.

**Doha, Qatar Jul 2, 2022** ([IssueWire.com](https://www.issuewire.com)) - [Promag Technical Services](#) is a division of Promag Engineering, which was founded in 2009. It has been our pleasure to be among the top electrical engineering service providers in Qatar, the UAE, Oman, Bahrain, and Saudi Arabia. As an electrical installation and MEP services company with a decade-long track record of success.

Our electrical contractor services include electrical engineering, electrical power distribution and control

(EPDC), electrical and instrumentation, [ELV solutions](#), and [solar power installation](#), in addition to MEP contract solutions.

info@promageng.com

Provide a high level of quality control and oversight for our industrial electrical engineering services, including new projects and existing high, medium, and low voltage installations. Services include design review and electrical engineering analysis (codes, standards, and regulations), technical documentation and specification review, planning and program management, budget variance control, quality assurance, subcontractor inspections, electrical verification, and testing, commissioning support and oversight, and final pre-operational and post-completion approvals.
