We make sure our coffee bean, from the branch to roasting, delicately follows a soft natural process to ensure the essence of the bean is in not in contact with any synthetic substances. We harvest our coffee weekly to ensure maximum freshness and taste timed perfectly from drying, screening, washing, up to roasting so you can taste the sweet goodness in the comfort of your home.

The founder [Rawad Srouf](#) is a die-hard coffee addict from Lebanon who immigrated to the states with the dream of sharing his Coffee which has always been a big part of their family tradition. They enjoy having their fresh cup of coffee every morning and then finishing it every evening without fail.

Rawad dedicated his life to making fresh coffee for everyone when he realized that the country he had immigrated to lacked the freshness and true taste of coffee that he enjoyed every day back home. Hence, [Fresh Qahwa](#) was born to revolutionize the taste of true coffee and let people experience what true freshness tastes like.
